COLE A. MONEY

UNIVERSITY OF WISCONSIN-STOUT

Anything to do with furniture is my highest interest at this time in life, old fashion to modern, from a hand carved time intensive woods project to a simple speedy low cost sustainable design, I love it all. Growing up I was always building things and loosing my dad's tools, being around a hands on family brought industrial design to be the perfect match for me. I feel my grandfather Ken Money sprouted my interests in furniture and gave me the ability to realize that you can do anything large or small if you just take your time, think about it and be patient. Later on in life I see myself being a lead designer for some sort of firm, possibly my own, it has to happen I am way to curious to just be satisfied with knowing enough about industrial design, I want to know it all.

-Take care ;)
