Cherry-licious Apple!

Contains 50% Juice

Why Cherry Juice?

Kids play harder and work harder today than ever before. Between school, team sports and normal activities, our children need all the nutritional help they can get! That's why we pack 10 tart cherries into every Cheribuddy juice box. Tart cherries are loaded with phytonutrients and can help improve sleep, accelerate sports recovery time, and reduce inflammation. Plus, kids love the taste!

*Go to cheribundi.com to find all the benefits one little cherry can bring.

Cool experiment!
Make An Egg float!

Step 1
Pour water into the glass until it is about half full. Place an egg in the glass of water and see if it sinks or floats (it should sink).

NO SALT, EGG SINKS!

Step 2
Stir in lots of salt. Stirr with I tablespoon and stir it until the salt dissolves. Keep adding more salt until the egg floats!

LOTS OF SALT...
EGG FLOATS!

Step 3
Next, carefully pour more fresh water until the glass is nearly full (be careful to not disturb or mix the salty water with the plain water). If you're very careful, you can get the egg to float between the fresh water and the salt water!

FRESH WATER ON TOP...
EGGS IN THE MIDDLE!

HOW DOES it WORK?

The egg is more dense than the fresh water (more molecules per square inch), which causes the egg to sink. When you start dissolving salt in the water it increases the density of the water (adding more molecules per square inch). When the water becomes more dense than the egg, the egg floats! When you carefully add fresh water again, this fresh water is less dense than the salt water so it floats right on the very top!

Who Knew?™
Behold. The Wonders Of Tart Cherry Juice.

Have you discovered all of the wonders of tart cherry juice? It could help enhance sleep, boost memory, reduce inflammation and promote overall good health, which makes tart cherries nature's best kept secret! Just visit us at cheribundi.com and take our 7-Day Challenge to see for yourself! If you're not feeling great after just 7 days, you'll get your money back! Be sure to check out the juice aisle for our complete line of tart cherry juices.

Did you know...
Depending on growing conditions, about 7,000 cherries grow on an average tart cherry tree. A cherry pie is made using approximately 250 cherries. So, one cherry tree could make 28 pies or more than 700 boxes of Cheribuddy! That's right, there are 10 tart cherries in every box! For more fun cherry facts, visit cheribundi.com.
Who knew? Well, now you do!

Cool experiment!

Blow up a balloon with yeast!

Step 1

Fill a clean, empty plastic bottle with about one inch of warm water. Be sure to use warm water not hot! Hot water can kill the yeast. Add all of the yeast in one yeast packet and gently swirl the bottle for a few seconds. As the yeast dissolves, it becomes active - it comes to life! Even though it's alive, the yeast won't move because yeast is a microscopic fungus organism.

YEAST
WATER

Step 2

Add 1 teaspoon of sugar and swirl it around some more. Like you and me, yeast needs food to be active. The sugar is the food for the yeast. Now the yeast is 'eating'!

SUGAR
AFTER 20 MINUTES!

Step 3

Blow up the balloon a few times to stretch it out real good. Then place the opening of the balloon tightly over the neck of the bottle. Let the bottle sit in a warm place for about 20 minutes. Soon, the balloon will begin to inflate!

BEFORE

How does it work?

As the yeast eats the sugar it releases a gas called carbon dioxide. The gas fills the bottle and then fills the balloon as more gas is created! Cool, huh?
