Abstract & proposal

This feature film is directed towards people above 17 years old.
The reason i chose to work in this project is because I wanted to discuss the super power is good or bad for a man, especially some super power that will let someone reap where one has not sown. I think almost all super power has some kind of ability that can make someone reap where one has not sown. and how people will do if they has this super power.
I will create this project by using Photoshop, Corel Painter, and Illustrator.
I plan to present this final project as an art book in a professional manner as a way to have a professional looking portfolio.
