COVER STORY:

ROBOTICS IN PACKAGING

An updated look at how robots continue to revolutionize packaging operations from primary package pick-and-place operations to end-of-line operations for palletizing and unitizing.

MACHINERY & EQUIPMENT:

LABELING, CODING & MARKING

We will cover a selection of methods and considerations to enable human- and/or machine-readable information in and on various package materials and formats and how the graphics capabilities of some of these systems can be leveraged.

MATERIALS & CONTAINERS:

CLUB STORE PACKAGING

A recap of the challenges that today's club store environment presents to packagers and how packaging remains a fundamental ingredient for success in this unique market.

TRENDS:

SNACK FOODS

This article will provide a market-capturing snapshot of the latest and most effective packages used for a diverse range of snack foods with examples of recent trend-setting packages.
