ReCoiler

Lexan composite material is high-strength *and* lightweight

Air bridge connects the ReCoiler to your compressor via the 5 ft. lead hose

Knockout quick-connect bosses for attaching the ReCoiler to the Air Station (sold separately)

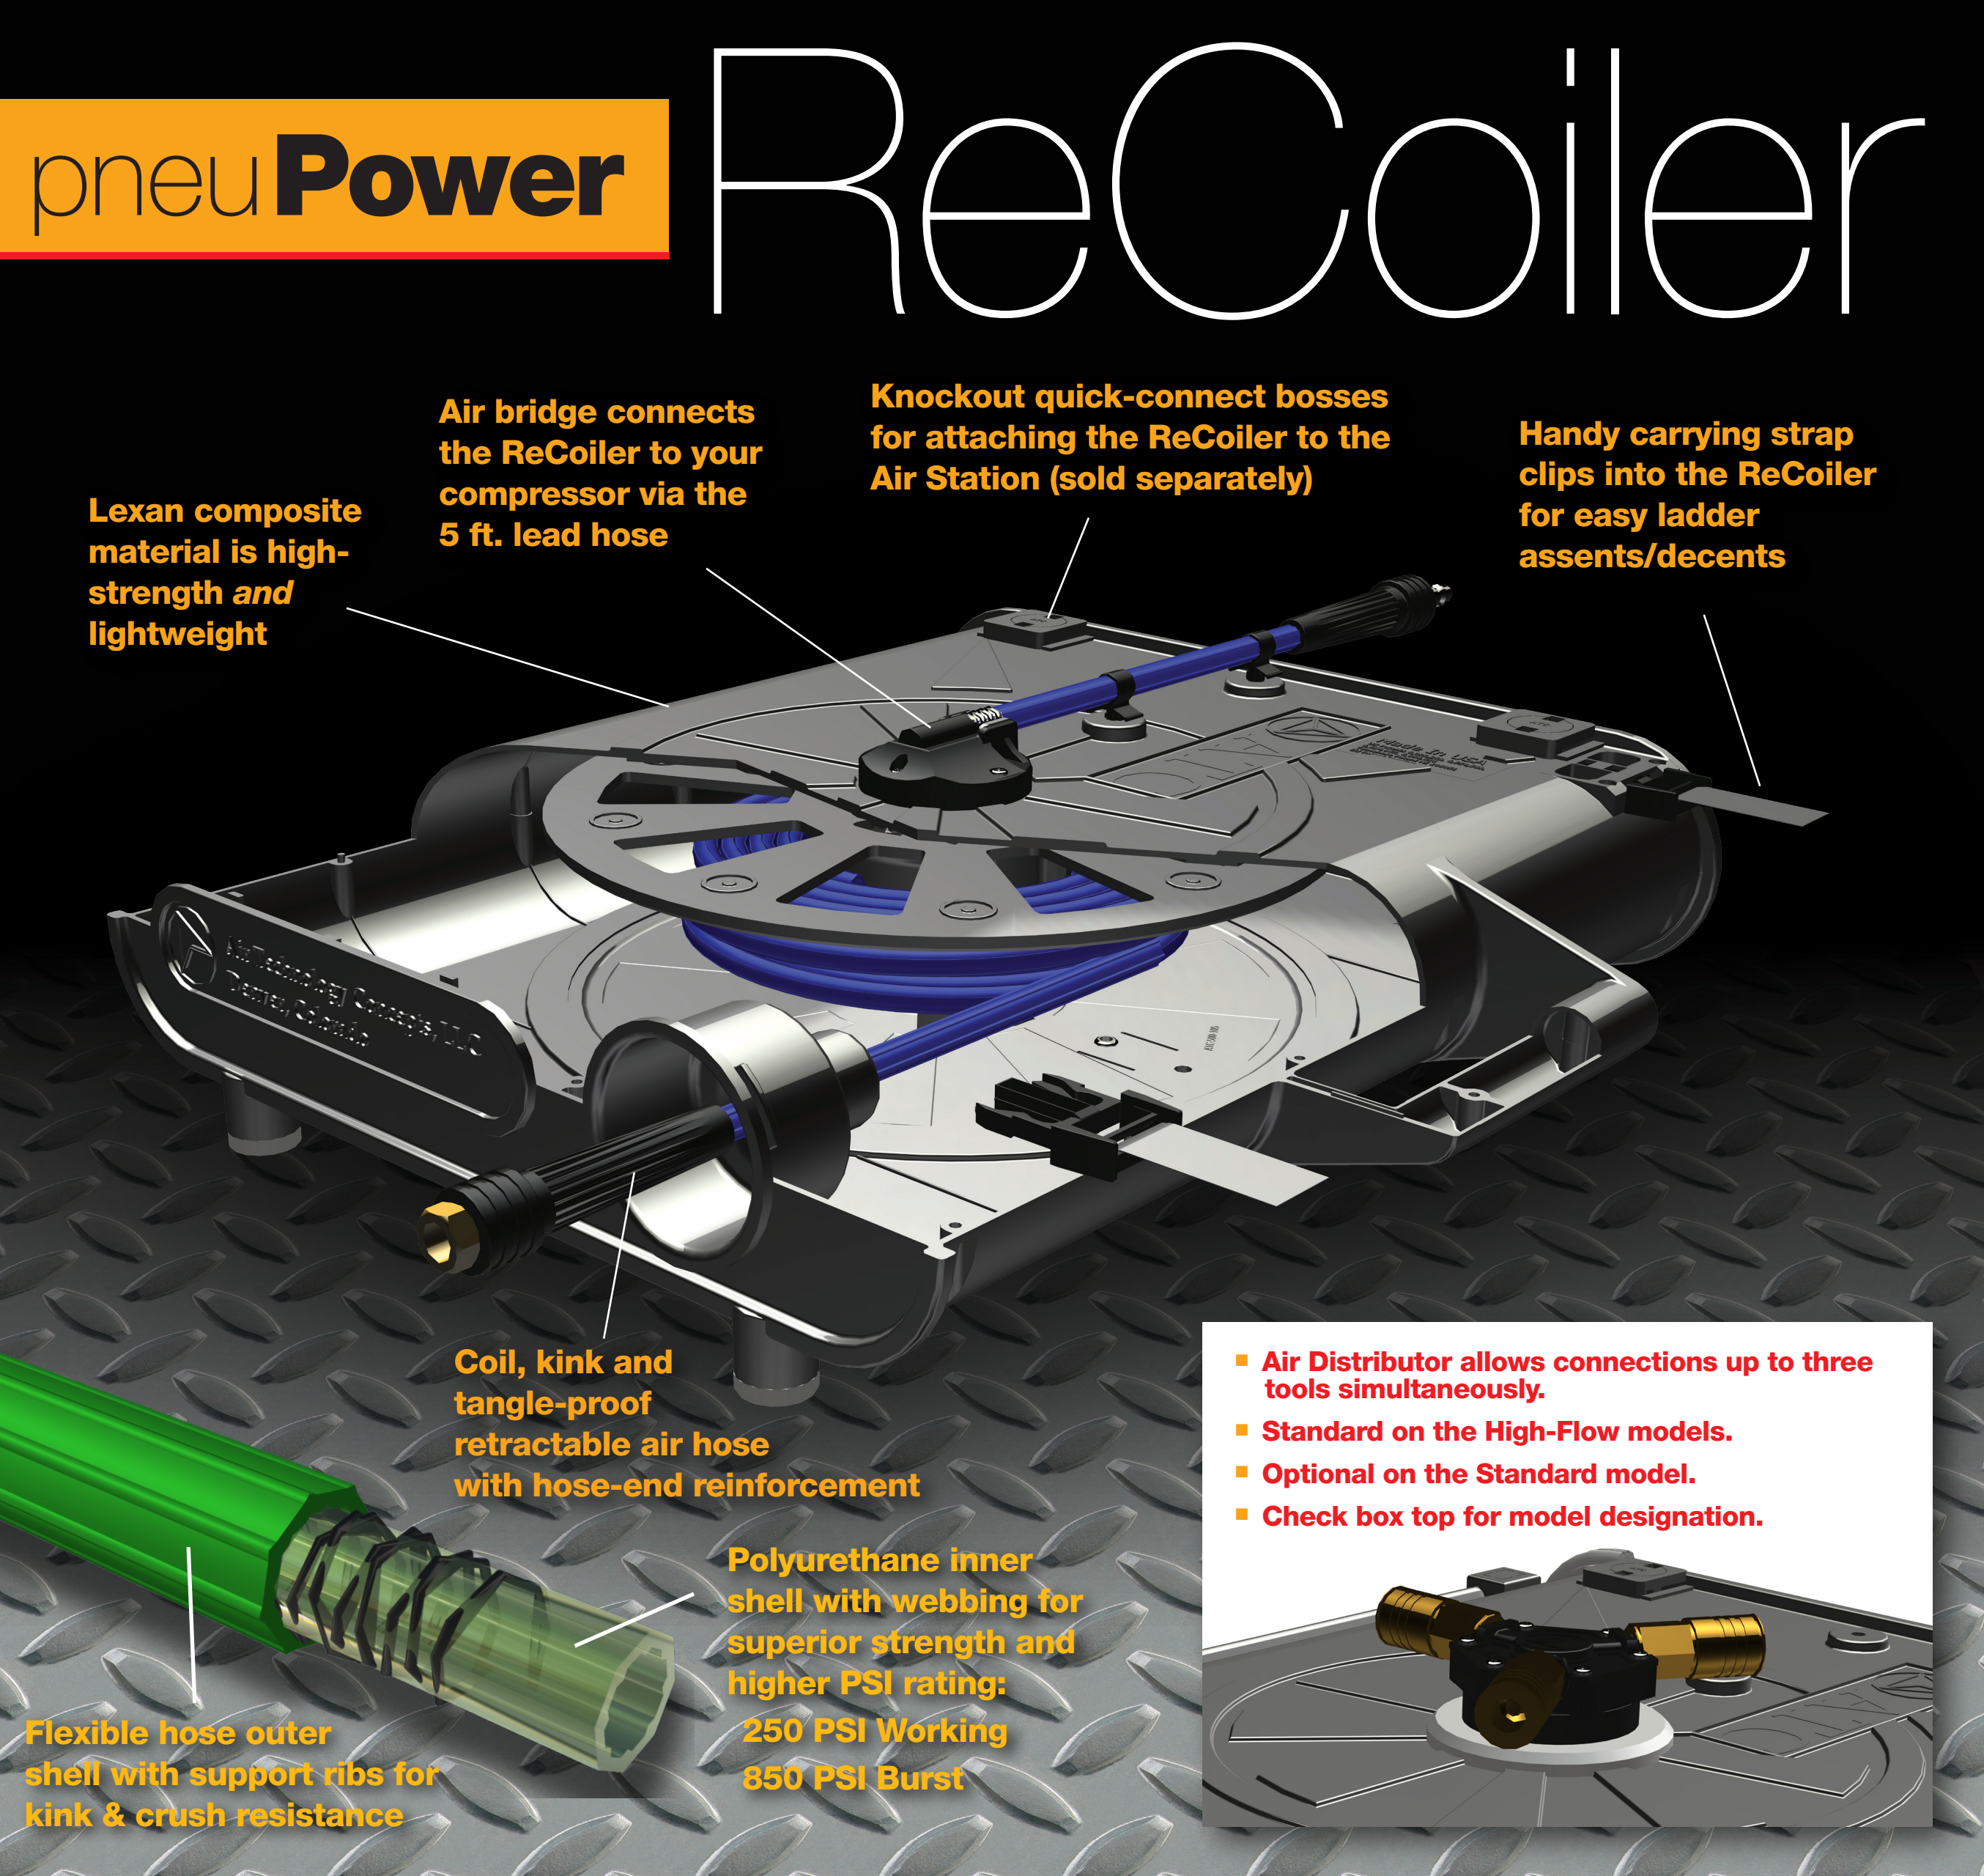

Handy carrying strap clips into the ReCoiler for easy ladder assents/decents

Coil, kink and tangle-proof retractable air hose with hose-end reinforcement

Polyurethane inner shell with webbing for superior strength and higher PSI rating:
250 PSI Working
850 PSI Burst

- Air Distributor allows connections up to three tools simultaneously.
- Standard on the High-Flow models.
- Optional on the Standard model.
- Check box top for model designation.

Flexible hose outer shell with support ribs for kink & crush resistance
