# CelluFirm

Body Circumference & Cellulite Reduction

- Smoother skin texture
- Tighter & firmer skin
- Circumferential reduction

Visible results. No downtime. Safe. Non-invasive.  
Non-surgical. Clinically proven. FDA approved.

# CelluFirm

## Body Circumference & Cellulite Reduction Treatment

CelluFirm features a new and improved all-in-one non-invasive system for effective body contouring and cellulite reduction. This non-surgical body shaping treatment tightens the skin and improves skin texture.

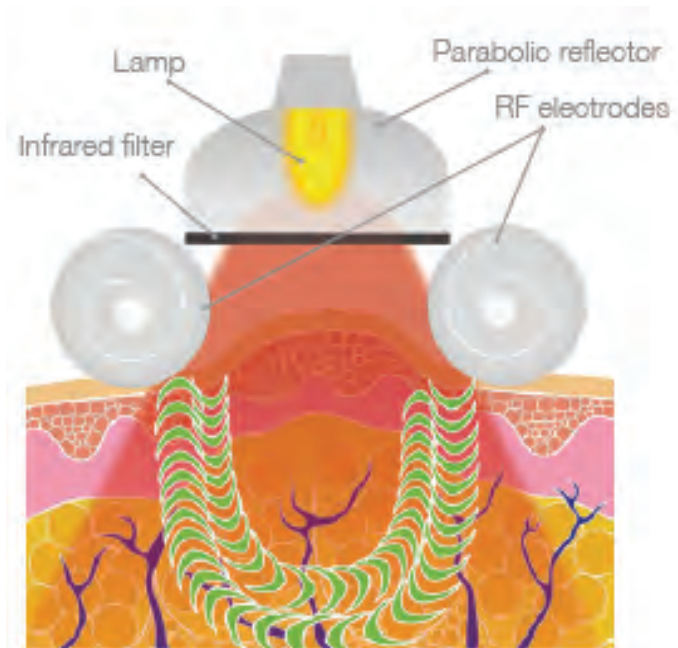

Experience improved blood circulation, fibroblast stimulation and increased lymphatic drainage, metabolism, collagen production and oxygen intracellular diffusion.

BM057(398)	<b>CelluFirm</b>	<b>Abs</b>	<b>30mins Session</b>	<b>\$398.00</b> <small>(\$425.86 w/GST)</small>
BM058(398)	<b>CelluFirm</b>	<b>Arms</b>	<b>30mins Session</b>	<b>\$398.00</b> <small>(\$425.86 w/GST)</small>
BM059(398)	<b>CelluFirm</b>	<b>Thighs</b>	<b>30mins Session</b>	<b>\$398.00</b> <small>(\$425.86 w/GST)</small>

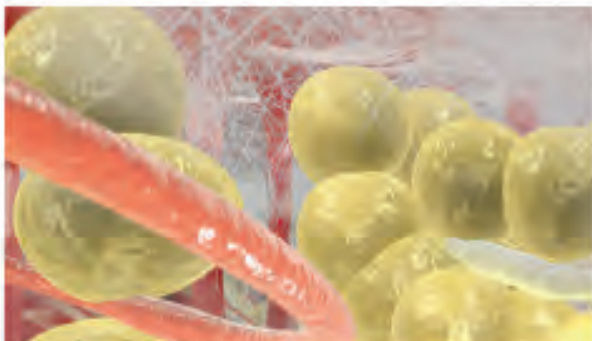

The first clinically proven non-invasive class II device to receive FDA clearance for circumferential reduction and cellulite reduction. In addition, it is CE marked for the treatment of cellulite and body contouring.

# The Extraordinary Science of CelluFirm

The CelluFirm system features the revolutionary combination of bi-polar radio frequency (RF), infrared light (IR) energies, vacuum and mechanical tissue manipulation.

Before CelluFirm Treatment

# The Extraordinary Science of CelluFirm

IR heats the tissue up to 5mm  
RF heats the tissue from 2 to  
approx 20 mm in depth

After CelluFirm Treatment,  
reduction in the size of the fat cells  
and fat chambers

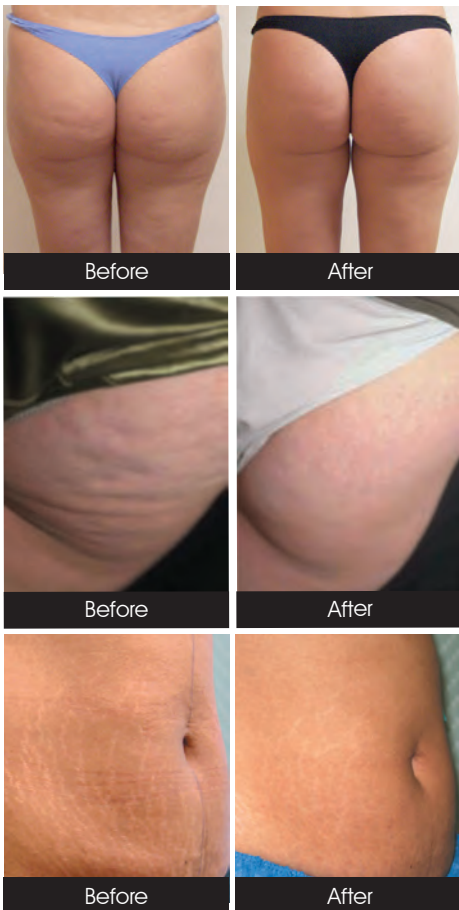

## Synergistic Use of Energies

The CelluFirm system employs four treatment modalities:

- Infrared light (IR) heats the tissue up to 2 mm depth.
  - Radio Frequency (RF) heats tissue from 2 to approx 20 mm depth.
  - Vacuum provides improved circulation, a precise demarcated heating effect and fibroblast stimulation.
  - Mechanical massage provides lymphatic drainage (dermal and hypodermal).
- 
- The synergistic combination of infrared and conducted RF energies increases the oxygen intracellular diffusion through the heating of the skin.
  - Vacuum and especially designed rollers manipulate and smooth out the skin to facilitate safe and efficient energy delivery.

# Remarkable Results

1. Increases the metabolism of stored energy (lipolysis)
2. Increases lymphatic drainage
3. Reduces or shrinks the size of the actual fat chambers
4. Increased collagen production in the dermal / hypodermal zones due to fibroblast stimulation
5. Reduction in the circumference (inch loss) of the treated area
6. Smoother appearance of the treated skin's surface

*“ I am very pleased with the results that my clients are seeing. They report a boost in self-confidence and look forward to their appointments. Excellent Results! ”*

- Cindy Ann Eckstein,  
CEO, Smooth Body Laser

CelluFirm is quicker, safer and more effective with the FDA approved system comprising of the following technology:

Radio Frequency (Bipolar RF)  
 InfraRed Rays (IR)  
 Vacuum Suction  
 Mechanical Massage Rollers

**Higher (RF) Energy**  
 Higher efficacy  
 Quicker treatment

**Clever Terminal**  
 Better control of patient's treatment protocol  
 Monitors device activity and performance  
 Provides service diagnostics for your system

**Dual connector**  
 Enables fast transition between applicators in treatment

**Replaceable Applicator Covers**  
 Optimal treatment results  
 Eliminate cross contamination
