

The "V"

The recurring V shape is a quintessential feature of the Cadillac identity. The subtle 7 degree angle is a recurring form throughout the body and the Cadillac finds a balanced composition between obtuse and acute angles.

Transitions

Throughout the CTS the transitions between panels aren't quite as organic as one may find on other cars.

As evident in the hood and intakes, a panel of the body falls beneath the main form, leaving vignetted chamfers around its edges.

Lines

Long sweeping lines are another prominent feature of the Cadillac brand. With the intent of leading the eye across the form, broad sweeping lines and long rectangular forms make up the bulk of the car.
