

## Storage Console

The center console can be used to store supplies, materials, and papers that are not needed.

Having 2 drawers on each side of the console allows for plenty of storage space for different supplies.

## Desk Arrangements

These desks are very versatile in their arrangements. They can be individual desks or arranged in a full circle or in the “wave” pattern for smaller group activities.

Kids are able to maneuver the desks themselves given the lightweight plastic being used in the design.

## Flip-Open Desk Lid

The desks will have a flip open top that gives space for the children to store their books and papers.

The lids have two different hinges. One for the basic movement of the lid and the other is a lid supporting hinge that will hold the lid open
