green office green environment

The Green Office is not about the color of your office space, but the desire of business owners and managers to be socially and environmentally responsible

The latest products in OP are designed for modern office environment with the environment in mind.

At OP, we aim to reduce the impacts on our environment for now and the future. We offer different kind of sustainable material that have been identified to have a reduced environmental impact.

GECA 28-2006-
FURNITURE AND FITTINGS

OP being the first commercial furniture manufacturer in Asia to be eco label certified.

Most of the decisions we make today have an environmental impact on tomorrow. We know that riding a bicycle to work is less damaging to the environment than driving a car. And we know that putting an extra jumper on in winter creates less greenhouse gases than turning on the heater. As consumers, we make decisions every day about what we buy.

“ To encourage the demand for and supply of products which reduce the stress on the environment during their entire life-cycle.”

As both a consumer and supplier, Office Planner has made the decision to embrace eco-labeling as a key corporate value and being the first Singaporean office furniture manufacturer to be certified eco-label. We are determined to reduce the waste produced and what is sent to landfills. Our role as a consumer is to integrate eco-friendly materials into our product lines thus producing democratic designed and eco-friendly furniture for our consumers so that they can make that responsible decision to consume only eco-label products.

Concurrently, we are designing and developing new office system furniture with less materials and components thus reducing greenhouse gases. Office Planner is determine to reduce, reuse and recycle so that the decisions we make today will impact positively our tomorrow.

go green . . .

Democratic Design Furniture

We believe in design and research as corporate values. We are convinced that creativeness can be achieved whilst paying close attention to detail, solving technical and production issues. There are always new needs arising from the new ways we work and communicate.

Since our incorporation in 1997, the Happy Office People at Office Planner have been supplying democratic design furniture. We have been listening and understanding the needs of our clients to continuously bring creative innovations and offering simple solutions to the ever changing office landscape.

Our customers are mostly the users of our products, but not the buyers. That is precisely why our products have to comply strictly with regulations and ergonomic, functional and safety specifications. That is why we seek and comply to ANSI BIFMA 5.6 -2003 standards and SS 514 : 2005.

Beyond the certification, we hope to herald a new understanding of the work environment known as "The Happy Office" by providing office system furniture which can be personalize, resulting in a happier and more productive workspace.

1. Philippe Starck (2008)

INTERNATIONAL DESIGNERS

In July 2008, we have brought Philippe Starck's xO range of furniture to Singapore, Australia and Korea. Creating xO boutiques in these 3 countries have open doors to a new concept in retail business. Operating these standalone boutiques have added presence to the brand name.

In March 2009, we have launched Pinker by world renowned designer, Karim Rashid for the contemporary office workplace, which includes a SOHO desk which can be used in a home office environment.

In 2010, we launched a radical range of office furniture, designed by famous German designer Werner Aisslinger. Flow, Office Desking Landscape (Flow), heralds a new era in the office environment, and transforms one's working space.

In 2011, heir to Maurice Calka's legacy, his son Serge Calka gave us the right to edit his father's late 60's design. The Boomerang Desk.

In March 2012, we are launching "Elle & Lui" desking systems designed by Christian Ghion.

BLADE

open plan panel system

Office Planner is the first Singapore and Asian owned manufacturer to be Ecolabel certified by GECA for its "Blade" open plan panel system.

The prestigious Ecolabel is awarded to companies that meet or exceed voluntary standards of environment performance. The Blade system meets the criteria in the types of material used in the manufacturing process and in its packaging. OP also provides a warranty against manufacturer defects and replacement of parts and it also complies with labour, anti-discrimination and safety regulations. With Blade, Office Planner is taking its first step to reduce environmental impacts and encourage sustainable management of resources.

OFP-2009

MOBILINK

open plan panel system

Mobilink is a fully flexible open plan system which was designed with many varied considerations. It typifies what is currently known as the universal pole concept whereby the single pole can be fully utilized in various configurations. The universal pole can be used as an end pole, 2-way, 3-way and 4-way pole, typically applied in a monolithic and tiled open plan system. Inventory is greatly minimized.

MOBILINK

open plan panel system

The 90 degree workstation occupies only 3.24 sqm of space. In an office layout when lack of space is an issue, this compact workstation has all the necessary features to complete it.

The workbench consists of components that can be easily configured and reconfigured. This makes it ideal for large-scale layouts and continuous expansion in the workplace.

Creates higher workstation densities
Organic shape top provides large working space
Creates a less structure design environment for the office

Ergonomics is clearly what this configuration is all about. Equipped with an open shelf and a swing door cabinet, storage is only an arms length away. The ergonomical curve worktop allows the user to move in close to the computer screen. Working space to the left and right are ample.

All supervisors require a balance between communication with colleagues whilst maintaining privacy. The high panels provide the necessary privacy. The Elena leg structure provides a modern feel to the workstation.

The Hi-Lo combination shown in this configuration provides the perfect combination. Its low panels provide interaction and sharing of information between colleagues whilst its high panels allow storage elements to be suspended off.

FLOW

office desking landscape

FLOW designs and revolutionize the office from a single plane to a multi dimensional work space.

The multi tier work place is not only about the hierarchy but the different levels of designs waiting to be discovered and realized.

the FLOW system with its light elegant design is a new modular desking system which creates landscapes for the newer generation of offices...

Flow is a progressive design answer to the needs of office work.

Werner Aisslinger. 2009

VESA

open plan desking system

Easily configured into clusters of 2, 4, 6 and more, the VESA desking system with its extendable structures makes it a flexible system for changes to be made effectively and quickly.

TRAKS

open plan desking system

TRAKS has been designed for all types of offices. Ranging from the individual to a team office to a large open plan office, it combines aesthetics with functionality. Completely flexible, it can be quickly reconfigured to suit many different needs.

ULYSIS

executive desking system

A functional and ergonomic desking system, ULYSIS allows the best freedom of movements. Extremely robust and stable, it can be used in a single office configuration or combining its elements to form cluster of desking systems. Energy of color brings light and comfort in the office. The ULYSIS desking system adds an element of modern and playfulness in your office.

TRAKS

executive desking system

TRAKS is an integrated system based on rectangular metal profiles which allows for a wide range of office desking solutions, i.e.: free-standing straight desks, multiple workstations, in-line sharing desks, bench applications.

VESA

executive desking system

The attractive design of the VESA range offers solutions that range from single desks to workstations. Its versatility and quality allows creating a work environment not only functional but aesthetically high-level.

Its tubical profile adds a organic sleekness when combine with a tempered glass modesty panel. Available in 600mm and 800mm widths to suit most desking dimensions.

ROBUST

executive desking system

Be it a single elegant table or a complex system, the ROBUST desking system creates a special and refined space in the office. Its aesthetic simplicity inspires calm, creativity and clear thinking.

The ROBUST range can be fitted to both clerical and semi-executive programmes, thanks to its attractive design, quality and versatility.

Fixed or adjustable, centered, off-centered or small foot, it offers solutions that range from single desks to work stations, by simply using all the accessories of ROBUST programme.

ZED

executive desking system

The sleek and clean design of the single ZED leg brings aesthetics, visual appeal, operational simplicity and functional performance. The measurable readings on ZED enable maximum precision in height adjustable and enhance work efficiency.

ARIANNA

height adjustable desking system

Arianna brings a whole new world of office ergonomics to the office workplace. Available in a manual cranking system or a electronic height adjustable mechanism, Arianna provides flexibility in the office workstations enabling the individual user to adjust the height of their work surfaces to suit their personal ergonomics.

MONO

discussion table

The MONO discussion table is designed to make the convergence of people a pleasant and comfortable experience. Modern yet classic, the MONO discussion table makes the discussion area a place vibrant with life.

OCTO

meeting table

Octo meeting table is a system bench which stimulates the exchange of ideas, boosts creativity and give the work-place greater depth of emotion: the experience of interaction and shared fun. The beam arrangement provides for table formats and shapes in various configurations. Its sleek profile and chrome finish adds sophistication to the modern office.

ZED

discussion table

With a range of table shapes to support a variety of purposes, the ZED discussion table offers maximum flexibility for endless aesthetic and functional opportunities to the discussion area

JACK

height-adjustable desking system

The possibility to adapt the desk height to every operator's specific necessities is surely one of the most important needs for those who spend a lot of time working at their station.

The adjustment is available in three different versions:

allen key: the position desired must be decided before the worksurfaces assembly and the screw fastening.

crank handle mechanism: the position can be adjusted at any time with a simple rotation movement.

electric motor mechanism: here, besides the free adjustment at any time, it is also possible to memorize the different positions.

FLIP folding table

Folding table has the objective to offer a convenient, fast and aesthetically pleasing solution for setting up conference rooms, meeting rooms or, at least, in all those situations in which the desk, which ended its use must be removed and stored in warehouse.

OP offers two different types of feet and wheels that will facilitate the transport of the entire structure. A round foot which is matched to the particular wheels, called "skate", available in different colours, and an elliptical foot that comes with a standard 60 mm wheel. Both versions have, included as standard, the brake wheel.

The angle of the worktop is carried out with a mechanism located on the capital of the leg and that is operated by a slight traction of the two plastic handles positioned beneath the worktop. If the worktop sizes does not permit to operate simultaneously both handles, you can simply block one on worktop, pulling easily outside the top itself, and rolling it later.

FOLD training table

This mobile training desk is easily folded for storage (by nesting), its quick release button helps set the training room into "action" easily.

Available in 1200mm, 1500mm and 1800mm width.

It has bag hanger on both sides, so you can keep your luggage on its safely.

ABS modesty panel looks nice and tidy. Also, it is very durable

The top board is operated easily pushing the button by finger and you can fold it up. Then, tables can be nested together in small space and you can use your space efficiently

T10 folding table

The table is easily set up and put away by one-touch folding button and it provides your space more productive as it can be used for training table and meeting table.

BOK

desking system

World renowned designer Karim Rashid has once again made waves in the design world, with the launch of his new brand Pinker, an exciting collection of furniture that blurs the lines between home and office, redefining the way furniture is thought and designed.

The epitome of a new lifestyle, fun as an apple, the BOK personal desk turns a small (home) office into a vibrant place where working becomes a pleasure.

Fibre glass. Available in pink, white and lime green.

Customisable on demand.

Karim Rashid

BOOMERANG

maurice calka

A sexy moulded fiberglass desk, the largest version of the Boomerang desk was enough to impress French President Pompidou who owned one in white and placed it in the Elysée Palace. The contrasting baroque shape and 70's modern material raised a few eyebrows back then. Initially manufactured by Leleu-Deshays, the original Boomerang desks are highly sought after as only 35 were produced.

The 2010 version, the first re-edition ever, is true to this approach: each piece is individually marked and identified. Serge Calka, heir to Maurice, is the guarantor of the respect of the work of his father. Two versions are proposed, the first one with a set of three individual drawers, while for the other version, the top drawer is replaced by a visually appealing glove box. Moreover, the owners of the new Boomerang are able to choose their very own colour among a virtually infinite number of choices as each piece is produced on demand by a team of skilful fiberglass sculptors.

Maurice Calka

ELLE & LUI

christian ghion

"Elle & Lui" heralds a new understanding of the modern office landscape whereby individual sanctuaries are created for the exchange of beautiful ideas. Its sleek contours defy conventional offices and its sexy lines breathe a seductive tone which will excite the senses of many.

This Executive Desking Collection which offers sophistication through simplicity is designed by renowned French designer Christian Ghion and manufactured by the happy office people of Office Planner.
