ENDODONTICS®

## Set Yourself Free... Cordless Backfill Obturation Delivery Device

The HotShot device enables fast and easy delivery of warm obturation material for endodontic backfill. It's cordless and compact, making it easy for handling, cleaning, and storage. Whether you're using Resilon® or gutta-percha, the variable temperature settings allow you to control obturation flow characteristics.

Description	Part Number*
HotShot Starter Kit with gutta-percha	HSSKGP
HotShot Starter Kit with Resilon	HSSKR

**VARIABLE GAUGE NEEDLES**  
HotShot needles are available in 20, 23, and 25 gauge sizes, as well as multiple lengths. See reverse side for details.

Variable temperature settings  
150°, 180°, 200°, 230°C

**OPEN PLATFORM**  
Load your obturation material of choice (standard pellet size).

**MINIMAL HEAT TRANSMITTANCE**  
For safe delivery of warm obturation materials.

**EASY TO CLEAN**  
Unlike other backfill devices which get covered in hot, sticky material once the plunger is removed, the chamber of the HotShot device remains almost entirely clean, requiring minimal care and making life easier for your assistants.

**MULTIPLE USES**  
On a single charge. The rechargeable lithium ion battery will last 3-4 hours.

**COMPLETELY CORDLESS**  
Allows unrestricted freedom of movement.
