JILLSTUART

Blossoming Beauty

Spring Summer 2013 Optical & Sunglasses Collection

In the season of sunlight and breezes, the Jill Stuart Spring/Summer 2013 Optical & Sunglasses Collection brings you a range of stylish romantic eyewear, featuring decor inspired by charming flowers and sparking crystals, many embellished with a simple but sleek signature "J" metal logo on the inner temple tips to exemplify the feminine designs of Jill Stuart. Offered in a wide range of vintage and modern frame options, this collection expresses the captivating allure of youth in spring and summer.

Flower's Fantasy

Jill Stuart captures the moment when colorful flowers bloom by turning them into design elements in this collection. Glowing diamante accents are also found on optical model JS70007 in a lightweight half-rim titanium eyeframe, paired with a graceful temple silhouette. Metal bouquets add graceful accents to the temples of sunglasses model JS20004, embellished with crystals like the morning dew on large eyeframe like superstar glamour.

Stuart's Style

The sweet and girlish design of Jill Stuart products infuses this season's collection with playful feminine appeal. On optical model JS60017, the elegant rectangular logo décor is certainly eye-catching, with an eyeframe that is an ideal match for any wardrobe choice. The vintage round eyeframe and slim golden temples of sunglasses JS20007 reveal a sense of trendy flair, in romantic rose red and exquisite pearl white options. (Top: 20007 C03, Bottom: JS60017 C02)

Diamante's Dazzle

Diamond is the symbol of everlasting love and its sparkle exemplifies the charisma of a stylish girl. Optical model JS60022 has its own dazzling charm, accented by the luxurious diamond-shaped element at the round temple. Diamond-shaped décor also stars on sunglasses model JS20008, which features a romantic vintage eyeframe that makes a girl stand out like the superstar she truly is.
