CAPITALE

### CAPITALE

An elegant secret perched in the heart of downtown Manhattan, Capitale is housed in a former bank (the vaults are still there) built in 1893 by Stanford White. From the soaring columns to the marble mosaic floors to the magnificently decorated ceiling, this Beaux Arts beauty is infused with elegance.

Guests can take in the royal interior and the atmosphere that evokes a bygone Golden Age while feeling completely of the moment, a place where today's style-setters and celebrities celebrate. The space lends itself to different configurations that keep the party flowing.
