

sabert products / compostable packaging

Wegmans Deli Plates

Client: Wegmans Supermarket

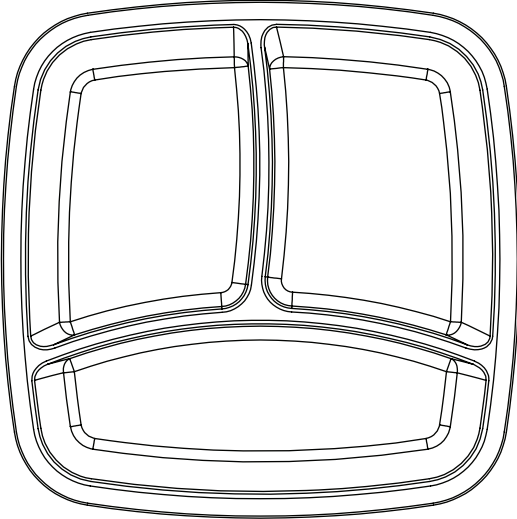

Project: Wegmans is replacing their compartmentalized deli containers with more environmentally friendly plates and lids. These molded fiber plates are made from recycled paper and are 100% compostable. They are designed as “to-go” plates with corresponding compostable Sabert PLA lid (with a patented lock I designed in 2007).

Dates: Oct 2008-Nov 2008

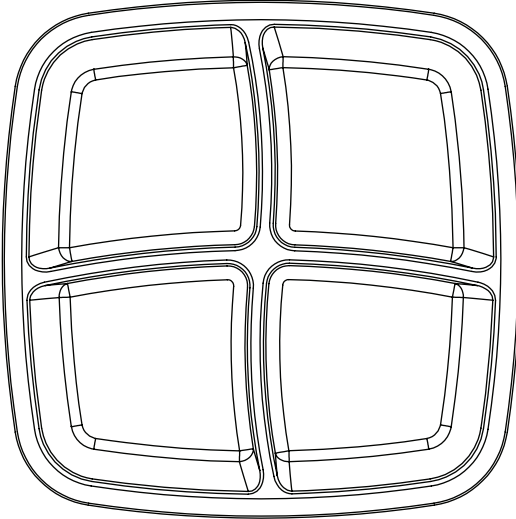

Status: in production
