

# FURNITURE DESIGN

*A handle for the kitchen fixture made in a organic shape we called this piece "the apple"*

*Image of the handle made of foam prepared to make a plaster mould*

*The metal piece is removed from the plaster mould, ready to be polish*

*After that, we used this metal piece to make another mould, made of silicon, in order to obtain copies of this handle. these copies were made of resin*

*This object was exposed together with others in the furniture fair, in the Valencia's Expo Fair, in the Politecnic University stand*
