

# MEDIA DESIGN

A DVD created within the scope of second design project named "teamwork" during the winter semester 2004/05 as a part of a course called "Informationstechnologie und Gestaltung international" in the FH-Lübeck.

It was created in order to show how studies and life abroad can be. it was not a real documentary, but many facts we showed in that film correspond to the truth.

this DVD contains 3 films, one film is set in Lübeck, the second in Malmö and the third film takes place in Valencia.

Each film deals with one special problem you could be confronted with during your exchange semester, at the end, all 3 stories build a big one. the film stops at certain point and the viewer can choose between 3 different solutions of the problem, you can interact with the film.

Elements used on this project: Video-camera Canon XM2 and Sony DCR-TRV250 Handy cam, Adobe premier 6.5, Windows Movie Maker, Final Cut Pro, Adobe after effects 6.0 & Photoshop
