

# EQUIPMENT DESIGN

*this project was made in the intensify course,in Equipment Design.*

*They gave us a concept,"Aqua-pop" as a proposal in order to develop our prototype,and this was our design,in this camera we collect the concepts of sea water and fashion colours from pop artist movement.*

*The 3D Studio Max was used in the first models design,after that,the elected one was moved to the Solid Works program.*

*Everything was measured up and then the milling operations were done to obtain the final model*
