TECHNOLOGIES

**SCHEDULING**

## tomorrow's scheduling...today

### **STAT Scheduling**

brings a 100% web, enterprise solution right to the desktop, for convenient, accurate and cost-effective scheduling, customizable by department. Combining the latest technologies - java applets, IVR, AJAX and sophisticated algorithms with medical domain and systems integration expertise - our solution solves all your scheduling needs—quickly and accurately

### **Scheduling For All Departments**

Radiology. Surgery. Oncology. Rehabilitation Services. Behavioral Health Cardio-Pulmonary, Clinics, Pre-Admissions Testing, Respiratory, Nutrition, etc.

Our fully integrated system keeps all your information organized and accessible with a mouse-click. Time required to schedule patients is reduced, workflow is streamlined and functions are consolidated. An integrated email/voice mail appointment reminder reduces expensive "no-shows" for more efficient scheduling and resource use.

### **Proven Technology That's Easy to Deploy**

Unlike other solutions, STAT offers customizable screens, logos, fields, reports and functionality for each department. Intra and inter department scheduling allows many different types of resources to contribute to or view the schedule, which can be invaluable when scheduling patient events. Our solution resolves conflicts for procedures and resources and, guides schedulers to make the right decisions throughout the scheduling process.

Our technology has been proven in large and small hospitals, academic medical centers, integrated delivery networks, clinics and physician offices. It is 100% web and compatible with all legacy systems. There is no client software to install, and no PCs to manage. Unlimited licenses make it easy to add users

### **HIPPA Compliance and Security**

STAT Scheduling allows users to accomplish all functions from a web browser over a secure network, with a unique username and password. Because of this security, you are assured of HIPAA-compliant access to all relevant data.

### **STAT Scheduling at a Glance:**

- ▶ **ASP or on-site license model centralized and/or decentralized solutions**
- ▶ **Outpatient and inpatient scheduling**
- ▶ **HL7 interfaces to registration, finance and clinical systems**
