

JFish Designs | Tabletop Ceramics

tableware and plantware made in Berkeley, California

I am Jennifer Fisher, the founder of JFish Designs, a handmade ceramic giftware company. I design & produce tableware and gardenware that customers connect with emotionally - items that are beautiful, functional, comfortable and beg to be touched. All of my products incorporate principles of 3D design with special attention paid to ergonomics. The following pages demonstrate my design process and show a selection of products from my current collection
