

3sixteen Showroom

Materials: Walnut, Walnut Veneered Plywood

Andrew, the owner of 3sixteen, had seen some of my previous work while he was finishing up a renovation on his new showroom space and was looking for some unique furniture. The long, two person workstation was designed and built first and then using the same aesthetics we made Andrew his personal desk and a smaller side table with the same chunky table top with bevelled front edge. A few months later a simple, modular display system was designed and built to display new items in the showroom and at future trade shows.
