# Joggle Woggle Machines

Various Joggle Woggles

Joggle Woggle Machines is an app for children of all ages. It has a very basic concept. Tap on the Joggle Woggle Machine, and out pops a random object to the screen.

The app will teach children object recognition, and verbal pronunciation.

Every time the child taps on a Joggle Woggle, a new object will pop out, and become part of the scene. Object part of the scene are tappable and will do an action.

There are three scenes/environments. A room, outdoor/park, and a city.

Each scene has unique objects related to that scene

Home Screen
To begin the game users must tap on the waving "Start Fun" flag.

Joggle Woggle Machines

Various In-app Objects

Room Scene

Every time a Joggle Woggle is tapped, a new object will pop out of the Joggle Woggle Machine.

As the object appears, the name of the object will be in text below it, as well as a voice pronouncing the name of that object.

Each item will fallback into the scenery. They will become additional "buttons" for the user to tap, in order to see and hear additional actions

Trumpet

The Joggle Woggle was tapped, and a trumpet has popped out of the machine
