

# Knowledge at your fingertips.

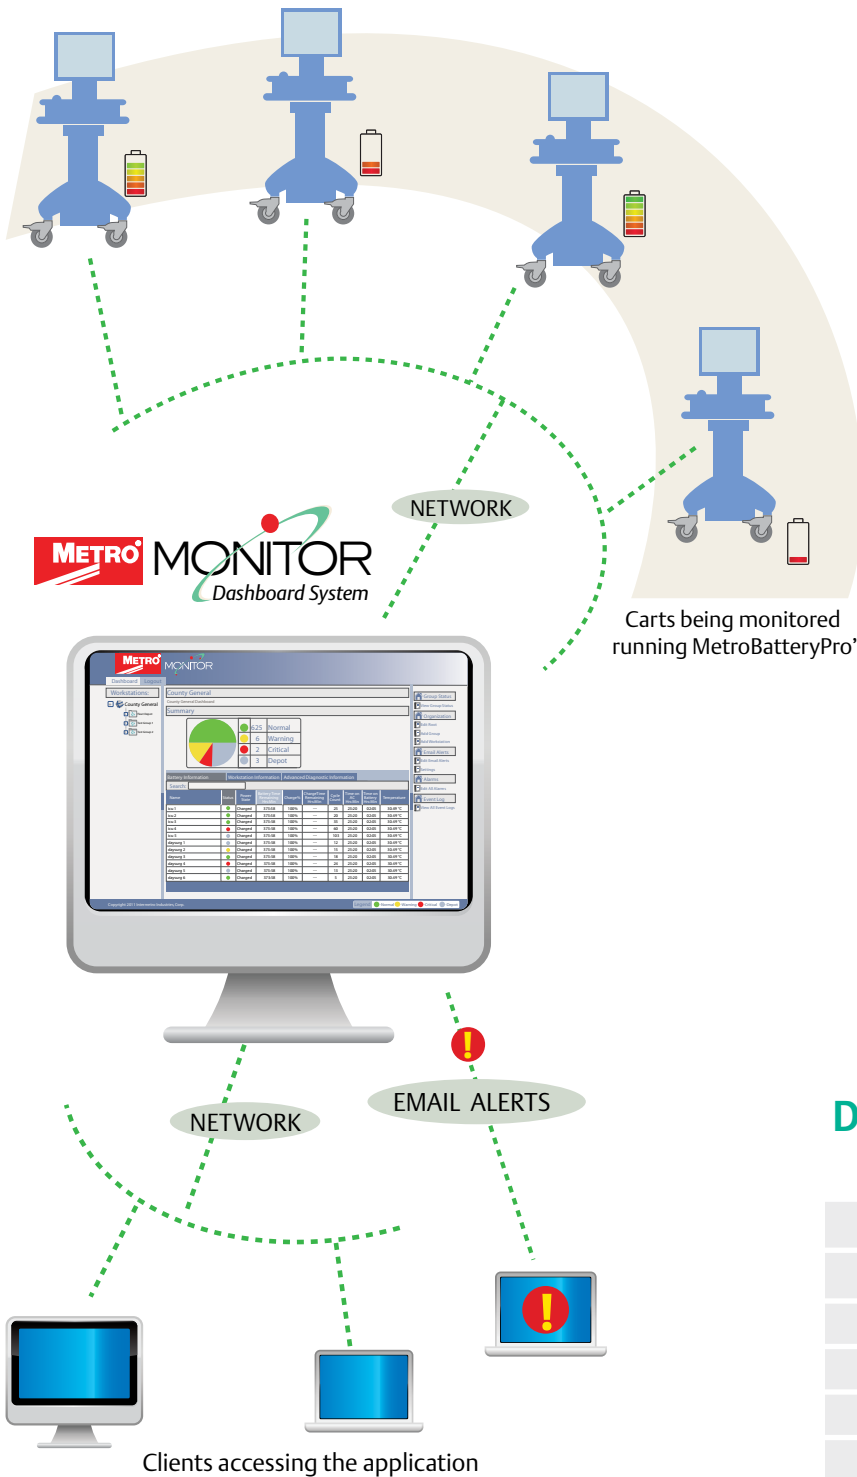

## **METROMONITOR™ DASHBOARD SYSTEM**

Introducing Metro's NEW intelligent management and monitoring dashboard system for mobile computing workstations. Provides IT professionals with enterprise software allowing web-based access of workstation performance, including power system and network connectivity, to streamline fleet management and increase workstation uptime.

- ADVANCED WEB-BASED CAPABILITY CAN BE SEAMLESSLY DEPLOYED TO IMPROVE REAL-TIME VISIBILITY REGARDING FLEET PERFORMANCE ALLOWING PROACTIVE SYSTEM MANAGEMENT.
- SCALABLE SYSTEM DESIGNED TO SUPPORT 10 WORKSTATIONS OR A 1,000+ WITH EASY-TO-USE GROUP CONTROLS
- AUTOMATIC WORKSTATION VISIBILITY AND SET-UP
- ALERT & ALARM MANAGEMENT
- ROBUST REPORTING FEATURES, INCLUDING POWER USAGE RATES, REAL-TIME UPDATES ON USER & ALERT MANAGEMENT AND OTHER ADVANCED FEATURES

# Manage and organize the entire fleet remotely.

Metro's Dashboard System is a NEW software application to assist IT professionals in sustaining maximum performance of their point-of-care computing technology.

When nurses can rely on consistent performance the hospital becomes more efficient with improved results. Your facility's IT team will benefit from easy access to a wide breadth of information through an intuitive web-browser. Your team can also receive email notifications and respond quickly to an issue and modify the delivery of these alerts.

The clear benefit of real-time power management and advanced analytics for Mobile Computing workstations - enables a facility to implement a predictive maintenance program and allowing for overall efficient fleet management.

### KEY BENEFITS:

- Metro's web-based software provides realtime status on an entire fleet of carts using a simple color-coded system.
- Enables users to organize fleet data in numerous ways, and to set alerts at all levels – from a single cart to the entire fleet.
- Provides information from MetroBatteryPro including: charging status, charge %, cycle count, battery capacity, battery health, etc.
- Supplies information on the Operating System including: OS system, last reboot, IP address, operating system and RF signal strength.
- Searchable history log for each workstation; Searchable event log.

### Dashboard System - Key Features

	Dashboard	Competition
