[Home Energy Audit](#) [Existing Buildings](#) [New Construction](#) [People](#) [Links](#) [Contact us](#)

Sylvan Energy Consulting, LLC is a professionally certified team of individuals specializing in building performance verification and energy efficient building design. We work with home and building owners, architects, builders and developers to maximize building performance. Higher performing buildings cost less to operate and maintain, are healthy and comfortable to live in, and **have a lower impact on the environment**. Whether your goal is to weatherproof your existing home or build a development of net-zero energy use homes, Sylvan Energy Consulting can help. For homeowners, a **Comprehensive Home Energy Audit** can put you on the road to a greener and more affordable tomorrow. Lighten your footprint. Enhance your wallet. We can help.

- Energy Star™ Portfolio Manager

## FULL-SERVICE RES PROVIDER

Synergy Viridis offers turnkey renewable energy systems to meet the specific and varied needs of our clients. Our professionals understand that a renewable energy system does not stand alone, but acts in concert with the mechanical systems and the grid it supplies energy to. This is why every system we design and install begins with a thorough assessment of the site, its energy potential and the built environment associated with it.
