

# Enterprise

Facility Management

Enterprise is a mutual service solution designed to connect every room with control and corporate data — providing better business outcomes.

# Big Data

**10%**  
structured

Structured information is data-base data.

**90%**  
unstructured

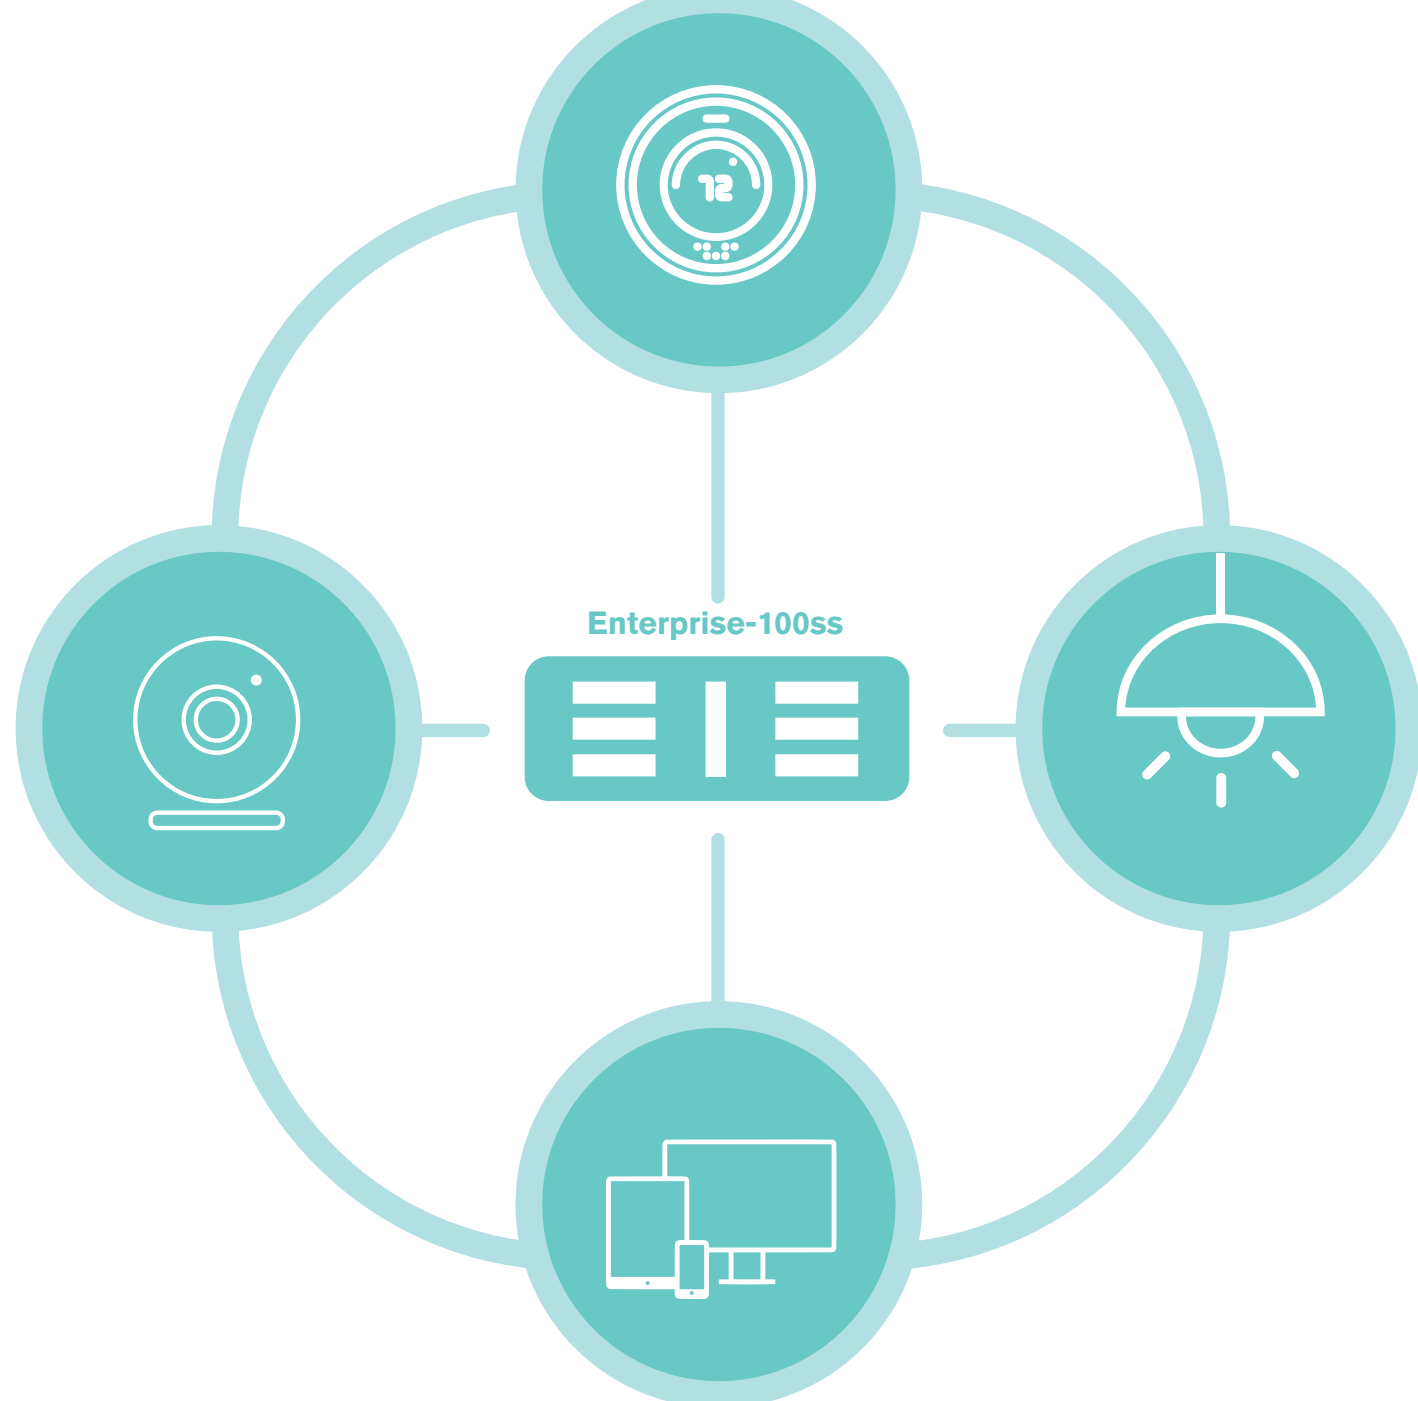

Unstructured information is 90% of Big Data and includes emails, temperature, videos, lights, tv, phone calls, internet usage and room usage.

Big Data in business is made up of structured and unstructured information.

# Room Control

Enterprise provides companies with real time monitoring, room control and access to more indepth data for greater oversight and analysis.

## The Modern Informed Business

# Why?

Companies who use Entrprise are:

**5X** more likley to make faster decisions

more likey to execute on intended decisions **3X**

**2X** more likley to use data more frequently
