

# SINE CHAIR

*Thinking Outside the Box*

## Sine Chair

As a design project focused on encouraging out-of-the-box thinking, 2 randomly selected criteria (1- A place to get away, 2- a place to read and write music) were used to design a piece of furniture. The Sine Chair was the result.

The Sine Chair allows you to escape the everyday by enclosing you in something intimate. The sine wave inspired shape allows the user to curl up or stretch out in any direction. By using the unique string grips to sheet music, the chair encourages both the reading and writing of music. By having amazing acoustical properties within, the user is able to play nearly any instrument while in their own personal escape.
