SCIENCE-FICTION INSPIRED HIGH-END SALT AND PEPPER GRINDERS

**"SALT AND PEPPER GRINDERS FOR THE STAR WARS FAN"** The design of these grinders clearly came from Luke Skywalker's green blade-emitting lightsaber he wielded in George Lucas' 1983 film, *"Return of the Jedi."* The thought of "wielding" a salt-grinding "lightsaber" appealed to certain people. The idea was to give the cues (or clues) to the lightsaber, while keeping a high-end aesthetic. On the right, the 3-D printed stereolithography models of the "Twist" grinders.
