

NASSAU UNIVERSITY MEDICAL CENTER AMBULATORY CARE PAVILLION
East Meadow, NY

RE-BRANDING

The 50,000 square foot Medical Office Building is the first of several new buildings designed for the expansion and renovation of an aging Nassau University Medical Campus. It will begin to dictate the material palette and formal language of the future Master Plan buildings. The scale of the building attempts to mediate between the existing suburban sprawl and the adjacent patient care tower.
