

THE GREAT LAWN

The master plan identifies 450,000 square feet of strategic growth which responds to existing synergies (service lines, real estate configurations) and can be phased to respond to such factors as economic/political climate, new service lines, donor commencement, and market competition from adjacent healthcare providers. The “great lawn” becomes an organizer/catalyst for social interaction such as farmer’s market and/or health fair, and a resource of natural lighting/landscape amenities.

PROJECT DATA

size	450,000 sf
cost	\$860 million
program	Ambulatory Care Pavillion, Oncology Center, Ambulatory Surgery Center, Resident Housing Tower, Staff Cafeteria, Parking Structures
Principal	Steve Evers, Joe Mamayek
Design Director	Stephen Chung
Designer	Andy Golubitsky
