

Celle® Chairs

HermanMiller

Design

Say “SELL-uh.” Meaning a highly engineered, intelligent seating surface composed of hundreds of small cells and loops that support and respond to different areas of the body.

Celle performs equally well in business, healthcare, and learning environments worldwide. Blends unobtrusively with interiors, other furnishings, and architecture.

Features

You can't sit on water, but you can sit on a Celle

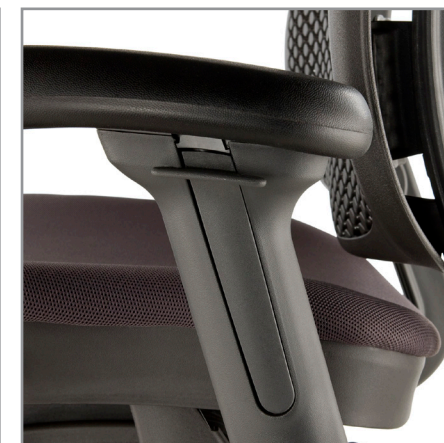

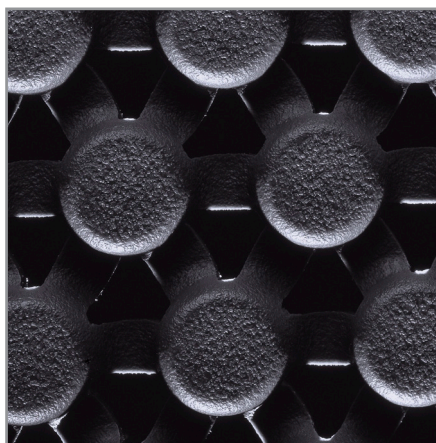

- The Cellular Suspension system created specifically for Celle creates a flexible framework.
- No two of the 1,578 polymer cells in a Celle chair are alike.
- The system lets air flow through, so that skin temperature remains constant.

Celle supports you with the same kind of buoyancy you'd feel if you could sit on water.

Adjustable and Adaptable

- Fits 95% of the world's population - tall and short, slim and not-so-slim.
- Make the seat higher or lower, move the armrests, control the tilt tension - personalize the chair to fit the way you want to feel.

Full range of adjustment controls at your fingertips.

Many Applications

- Celle performs equally well in business, healthcare, and learning environments worldwide.
- From dark to light, neutral to nature based, several colors are available
- A variety of Latitude upholstery choices.
- Conforms to domestic and global codes and standards.
- Blends unobtrusively with interiors, other furnishings, and architecture.

The right chair - not just for offices and conference areas, but for team and community spaces too.

Human-Centered Design

- Pelvic stabilization. The Celle backrest has our integrated, passive PostureFit contour.
- Kinematics. Our proven Harmonic tilt mechanism was applied to Celle.

The chair makes sure your spine stays properly aligned whether you're leaning back or sitting upright.

Sustainable design

Each Celle chair is made of one-third recycled materials, and, when its useful life is over, disassembles in five minutes and is 99% recyclable. It has earned MBDC Gold Cradle-to-Cradle  certification for its achievement in environmentally intelligent design. Celle is GREENGUARD certified and can contribute to LEED certification.

Warranty

The warranty on Celle is 12 years for the chair, 3 years on the gas lift cylinder. The warranty applies to the chair up to 24-hour use.
