

Vivo Interiors

HermanMiller

Design

Vivo provides performance, quality, and exceptional value. A thin profile and crisp, clean lines give Vivo a progressive look that complements its precise alignment and fit. Extensive material choices and tile styles allow freedom of expression; recent additions expand Vivo's expressive qualities even further. All of which lets you create spaces that respond easily to today's needs—and tomorrow's.

Features

Freedom of expression

- Frame-and-tile systems give almost unlimited versatility, design control and creativity.
- Offers variety in all aspects of planning, responsiveness to change and compatibility of older and newer components.
- Tiles are available in tackable, tackable/acoustic, painted, marker, power/data, open, rail, debossed, and glass versions.
- Variety of wall heights - 35 to 79 inches, so that you can achieve different levels of privacy.

You give your workers just what they need and not spend a fortune doing it. preference.

Attention to detail and a fresh look

- A unique sliding-door design for the system's overhead units. It echoes the rectilinear appearance of Vivo walls, while giving people a convenient way to access contents.
- Optional furniture-style glides and open work-surface supports lighten the scale of the workstations and promote air circulation.

Vivo exemplifies the trend toward light architecture.

Sleek, Modern Look

- Vivo means lively and bright.
- Trim pieces have a thin profile and interlock for precise alignment.
- Thin-profile stacking windows provide a sense of enclosure and privacy but maintain open views and let in light.

A polished appearance, clean lines, meaningful details.

Sustainability

- Designed according to our cradle-to-cradle protocol and is Greenguard certified, helping you achieve LEED credits.
- Vivo components are 69% recyclable.
- Frames are 100% recyclable steel; a typical workstation has 36% recycled content.
