

- UNIT INSIDE:
- High Brightness LED headlight
 - Stem mount ultra thin Li-Ion battery
 - 4 hour Rapid Smart charger (100-240 volt)
 - Quick Release handlebar bracket (fits 25.4 – 31.8mm diameters)
 - Helmet mount kit with extension cord

Specification Chart	
FEATURES	MITYCROSS
LED Output (lumens)	350
Bicycle / Special Lighting Modes	3 / 3
High-Brightness Run time	3.5 hrs
Low-Brightness Run time	17 hrs
System Weight (grams)	240 g
Charge time	4 hrs

MITYCROSS™

ULTRA-COMPACT RECHARGEABLE HIGH-BRIGHTNESS LED BICYCLE LIGHTING SYSTEM

MAIN FEATURES:

- Compact Aluminum alloy headlight
- Control button on headlight
- 6 settings in all
 - Brightness: High – Medium – Low light
 - Special: Flashing – Walking – SOS
- Light Brightness Indicator
- 3 Stage battery level indicator
- Exclusive Crossfire™ design doubles the viewable area
- High-Brightness LEDs with 50,000 hour LED life
- Ultra thin Li-Ion stem mount battery
- Rapid Smart charger
- Compact Quick release mount fits oversized and standard handlebars
- Compact Quick release helmet mount with more adjustability included

MITYCROSS™

ULTRA-COMPACT RECHARGEABLE HIGH-BRIGHTNESS LED BICYCLE LIGHTING SYSTEM

About CygoLite

In 1991 a group of cycling engineers saw a need for their technical expertise when it came to bicycle lighting systems. By combining the latest technological innovations with clean classic designs, we developed a line of lighting systems that made CygoLite synonymous with innovation and quality. Fast forward into the 21st century and we're still leading the way. With innovative research in the lab and constant testing on the trails, we continue to bring you cutting-edge lights that are tough, dependable and powerful. Thank you for your support. In return, we'll light the way for you.

Weighting a mere 140 grams, the MityCross' ultra-thin Li-Ion battery can be either mounted on the stem of the bike or attached to the helmet. Plus its power is long lasting and is easily replenished with the included Smart Rapid charger. Not only does it protect the light from overcharging, the Smart Rapid charger works on both 100 and 240 volt outlets, so you're free to ride anywhere in the world.

Lightweight Battery, Heavy Duty Power

To fight the darkness, you need the dual beams of the MityCross firing up powerful brilliance. These two LEDs cast a distant throw on the street for road riders in mind, while using Crossfire technology to give mountain bikers a wider swath of light for better vision on narrow paths and single tracks.

Pump Up The Lumens

Designed To Shine

All these great features come together in an intelligently designed super compact headlight that weighs only 55 grams and is great on the helmet or handlebar. The aluminum alloy is durable, weatherproof and helps maximize the heat transfer to protect the LEDs. The included quick release handlebar bracket is smaller and easier to mount to standard and oversized handlebars. Equally small is the new helmet mount kit that features better adjustability for use on the helmet.

The MityCross has six different operating modes that are easily controlled with a touch of a finger. The 3 brightness modes range from High—to light up the darkest trail—to an energy-saving Low that's still bright enough to see and be seen in traffic. The 3 flashing modes—flash, walking and SOS—are indispensable safety features for all riders. The MityCross comes with a light setting indicator as well as a 3-stage battery indicator so you're never left in the dark when it comes to power.

Mighty Smart

grams, the MityCross is the lightest and the brightest dual LED lighting system created by CygoLite. It's exactly this study in contrast – a lightweight yet sturdy aluminum alloy headlight, dual beam power in a single beam case, LED toughness with halogen-like brightness – that makes the MityCross the ideal lighting system. With the brilliance light up the darkest trail and a compact design to facilitate a long commute, it makes perfect sense that the most avid road rider and the most hardcore mountain biker can declare the MityCross the unanimous lightweight champion in its class.

battery and mounting bracket – tipping the scale at a mere 240 small yet amazingly powerful. With the whole unit – headlight, MityCross is deceptively light up the darkest trail and a compact design to facilitate a long commute, it makes perfect sense that the most avid road rider and the most hardcore mountain biker can declare the MityCross the unanimous lightweight champion in its class.
