

## What is LiveSource?

LiveSource is the MFG.com cloud-based sourcing tool that combines the power of advanced supplier management with the global reach of the world's largest manufacturing marketplace. LiveSource helps companies discover, collaborate and work with qualified global suppliers, resulting in smarter spending, reduced product costs, shorter delivery times, and a more flexible supply chain.

### Solving Conflict Minerals Gap

- 1 LiveSource allows for the collection of your suppliers as well as their supplier's documentation to verify that they are not sourcing from countries that are on the banned supply list.
- 2 LiveSource notifies you and your supply chain when any signed or verified document or certification is due to expire such that you will not find yourself working with a supply base that does not have current documentation on file.
- 3 LiveSource can act as your single supplier communication vehicle in which you can easily communicate your company's policies regarding Conflict Minerals and know who read the communication and when.
- 4 LiveSource can be configured so that you can establish as many levels of supply chain visibility as needed in order to protect yourself from any Conflict Mineral sanctions.
- 5 LiveSource can provide on-demand reports detailing which suppliers are and are not in compliance with your enforcement of the Conflict Mineral policy.

### Benefits of LiveSource

- Find More Suppliers in Less Time**  
Access to more than 150,000 global manufacturers including Woman-Owned, Small Business, HUBZone, 8a, Veteran-Owned and SDVO designated businesses
