

At New England Land Artisan, stonework is our foundation and horticulture is our roots. We offer landscape construction and horticultural services, specializing in authentic New England dry-lay stonework.

We have an insatiable desire to create and build. Starting with a concept of mind and spirit, the design process is embraced and driven by optimism and constant inspiration. The result is thoughtful and expressive outdoor spaces, and objects that have true purpose.

Whether you desire a beautiful sculpture, walkway, wall, patio, stairs or any stone feature — with care, craft and 22 years of experience — we can create gorgeous and timeless environments that beautify your home and landscape for you and your family to enjoy for generations
