A night club hired a trend consultant to come up with a briefing aiming to reinvent its identity. Their briefing :

"A classic and classy night club with a bit of burlesque at the same time where one can have serious fun"

For the lounge the design proposed a neoclassical lintel above the access to the dance floor and a mixture of bespoke and "saloon" style elements

At the main dance floor the client required an elevated "VIP" area with semi private booths along one side

For the exterior the concept goes with a discreet façade with subtle textural and lighting effects
