

A 50' sloop with an aluminum hull and wooden interiors

This was my father's first sail boat;  
The one I remember the most

The wood interiors encouraged a lot of "do it yourself" ideas, so the interiors of the boat were modeled in 3D to allow a better visualization of the customized parts.

Softwares :  
Sketchup  
Photoshop

Perspective Transversal Section rendering – simulated pencil

Night time perspective rendering – X-Ray effect and photographic insertion

Day time perspective rendering – simulated pencil
