TRAINING SERVICES

Stewart & Stevenson, a leading designer, manufacturer and marketer of specialized equipment for the oil and gas and other industries, knows that properly trained employees are essential to every company's success. At the company's ISO9001 certified training center in Houston, Texas, Stewart & Stevenson offers technical, business and essential-skills training that enables employees everywhere to be top performers.

The Houston Training Center's online Learning Management System (LMS), accessible to dealers, customers and employees via the Stewart & Stevenson website, provides convenient access to the catalog of courses with descriptions and class schedules. LMS enables online registration, tracks each student's training progress and reports successful completion.

Technical training, an integral part of Stewart & Stevenson's aftermarket customer support, is provided at Stewart & Stevenson's facilities in Houston, Texas; Denver, Colorado; Piscataway, New Jersey; Tampa and Fort Lauderdale, Florida; Bogota, Colombia, and at client locations around the globe.

Training support is provided to owners of Stewart & Stevenson's manufactured equipment. Wherever our well stimulation, coiled tubing and power generation equipment, rigs and Rail King rail car movers are put into service, our certified technicians and trainers will travel there to provide commissioning that includes equipment installation oversight, initial service, inspection, testing and operator training. Our goal is to ensure that your equipment is properly installed, fully serviced and fully operational, and that your personnel are completely trained.

OEM-CERTIFIED TECHNICAL TRAINING

Stewart & Stevenson's state-of-the-art training center in Houston, Texas features classrooms and laboratories devoted to technical training of our original equipment manufacturers' (OEM) products, including Allison, Detroit, Deutz, Electro-Motive Diesel, Hyster, MBE, MTU, MTU Onsite Energy and Webasto. The Houston Training Center is outfitted with the latest OEM product models and is staffed with certified trainers who provide factory authorized training. Certified training is provided for products of all OEM partners.

Course topics range from product familiarization to operation, maintenance and overhaul. Hands-on lab exercises are provided on new models using the latest diagnostic tools, techniques and manuals. Training can be delivered in a variety of media, including classroom, video and computer-based training.

Project specific training packages for OEM products utilized in both on highway and off highway equipment are designed to meet the exact needs of each client. Instructor-led Detroit, MTU and Allison classes are available at the Piscataway, New Jersey product training center. The Tampa and Fort Lauderdale, Florida facilities also provide MTU marine diesel engine training.

RIG TRAINING

Stewart & Stevenson's experienced instructors provide fundamental training for rig technicians and operators. Our Rig Operations and Maintenance course covers:

- General safety requirements for all equipment utilized in the spread configuration
- General construction and major components
- Rig operations, rigging up, rigging down
- Series 60 engine familiarization
- Stewart & Stevenson generator familiarization

Troubleshooting is also covered, including problems with engines, transmissions, gearboxes, drawworks, brake blocks, drill lines, air systems and masts.

WELL SERVICING TRAINING

The increase in well servicing and well intervention operations has resulted in a greater demand for trained and qualified workers. Stewart & Stevenson offers Well Servicing Operation & Maintenance courses to support our customers' needs. All classes are presented in a lecture/lab format using detailed digital media, up-to-date OEM documentation and hands-on experience in the lab.

Well Servicing Operation and Maintenance courses offered cover:

- Blender, Hydration and CAS units
- IPC, AccuFrac+ and Automated Fracturing equipment
- Coiled Tubing Units, CTU Power Pack systems, Injector Heads
- RCM Cementing units
- SCR, Data Vans
- Twin Pump Acidizing units
- Well Servicing Rigs

TECHNICAL DOCUMENTATION SERVICES

Stewart & Stevenson specializes in providing quality documentation support through our experienced team of technical writers, graphics illustrators and quality assurance personnel, who develop technical documentation for the various product lines.

Manuals prepared include:

- Operation & Maintenance
- Installation & Commissioning
- Balance of Plant: Familiarization, Training, Maintenance Plans
- Power Plant Operation & Maintenance Procedures

Technical documentation is provided in digital and hard copy formats.

Utilizing an experienced team of communication specialists and graphic designers, along with powerful authoring, graphic, and multimedia software, Stewart & Stevenson also develops E-Learning modules that improve our customers' and employees' training needs.

E-Learning modules can be developed for:

- Employee performance
- Employee communications
- Health & Safety training
- Compliance training
- Blended learning
- Technical training

E-Learning courses can also be developed for your Learning Management System (LMS) as SCORM compliant modules.
