

EMERGENT READERS

Susan B. Walker

A traditional lace and trace activity with a twist. This original concept of combining an emergent reader with lacing cards was developed as an answer to the question, "What's the best way to engage young learners?" Our answer became an innovative combination of interactive emergent reader and lacing cards. As Content Development Manager, I was responsible for the original inception of this idea, the emergent reader story content and copy, lacing card design direction, and accompanying parent copy and extension activities.
