

The Zaitsev

Tired of having your PC first person shooter prowess brought into question when you play your friends on a console system? The 'Zaitsev' adaptive gaming controller will silence your console-toting comrades once and for all.

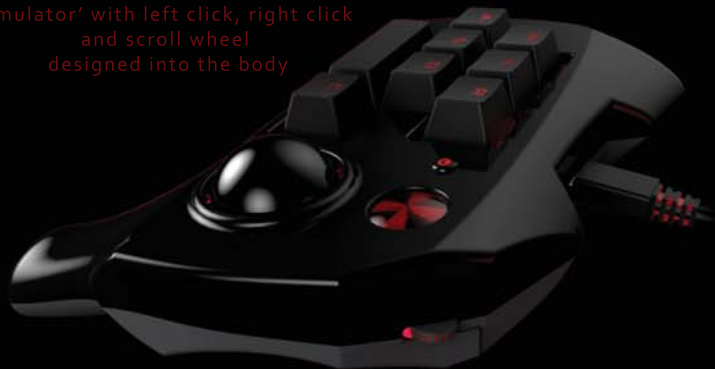

State of the art

heat sensitive thumb pad
replaces traditional joystick.
No moving parts means
greater accuracy and response

Revolutionary

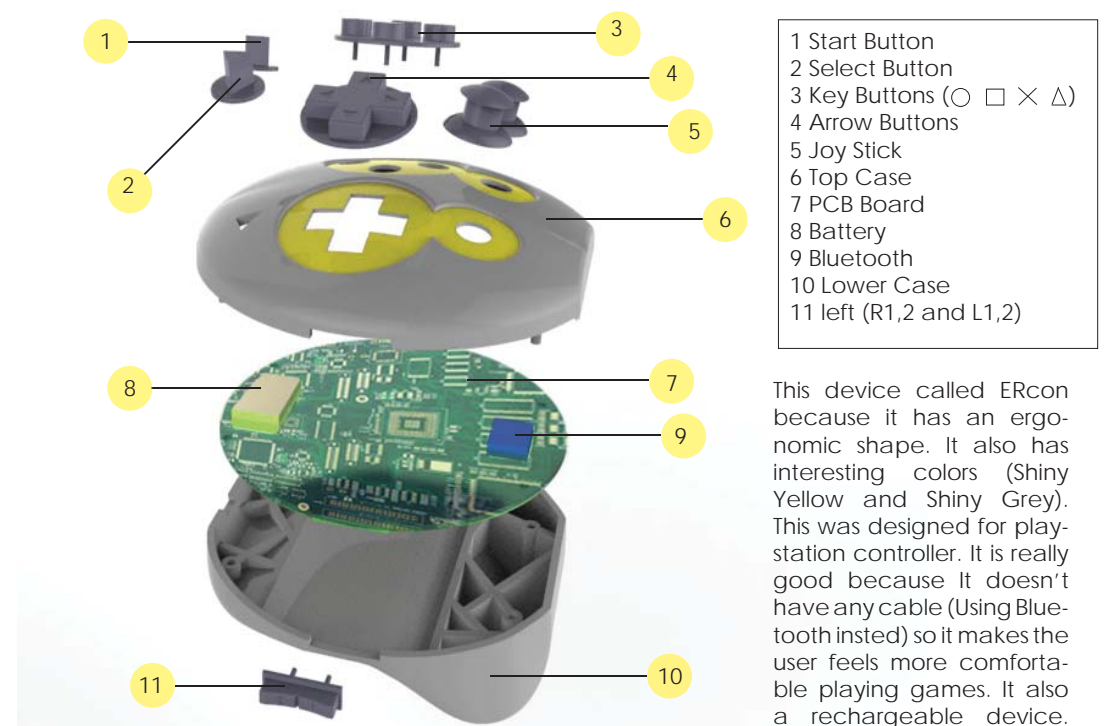

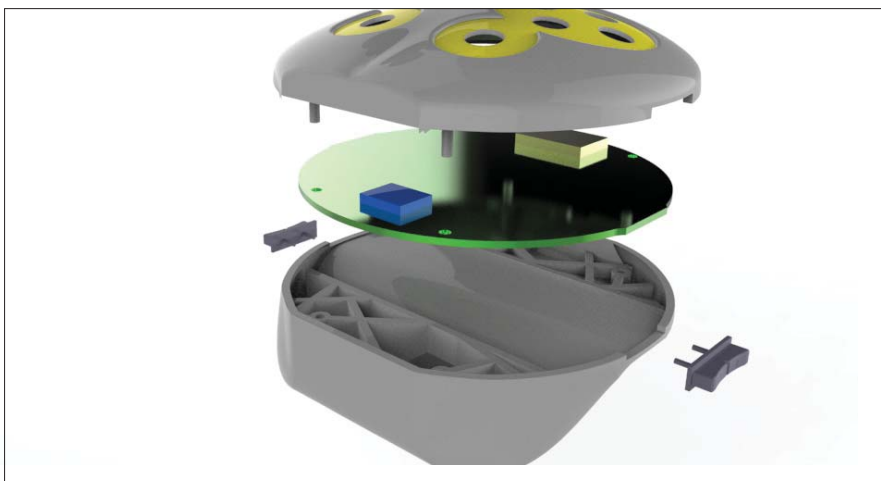

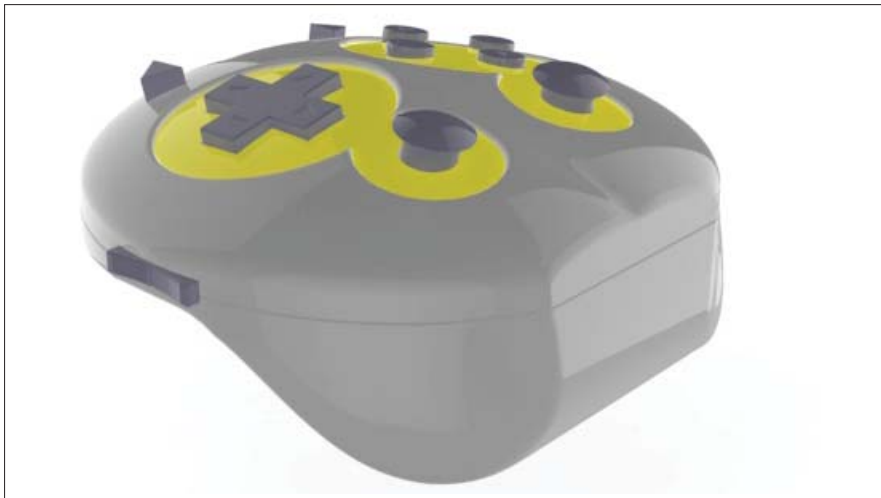

side 'mouse
simulator' with left click, right click
and scroll wheel
designed into the body

Ergonomic

weighting and handle design enable
comfortable gaming
either standing or when supporting
controller with a leg or knee

Using
Mounting
Bosses
and
Snap Hooks,
all the
components
are fixed
in place.

Front view

This controller
is able to twist
upwards and
downward for a
more realistic
feeling.

The lower part
of the handle is
design to have
fingers form for
a better grip.
