Skills and availability:

Good dialectic, personable, motivated, strong will and fast learning ability.

I am really curious and interested in everything that is new and unknown to me.

I love travelling and meeting new cultures.

I am flexible to move in other countries/areas if requested.

Goals and wishes:

I would love to have the opportunity to develop new products from the very first idea until the production phase, especially furniture/ home electronics/ entertainment/medical products.

I am searching for a stimulating working environment, that could extend my technical knowledge (graphics, software, feasibility, know-how), assuring both a personal and a working growth.
