Solutions for Enterprises

Our IIoT intelligent infrastructure offering provides enterprises customers with the main three elements they need:

GLOBAL CONNECTIVITY

SOLUTIONS INTEGRATION

MANAGED SERVICES

Industry's most comprehensive range of global Industrial IIoT connectivity options over multiple networks, including satellite and cellular.

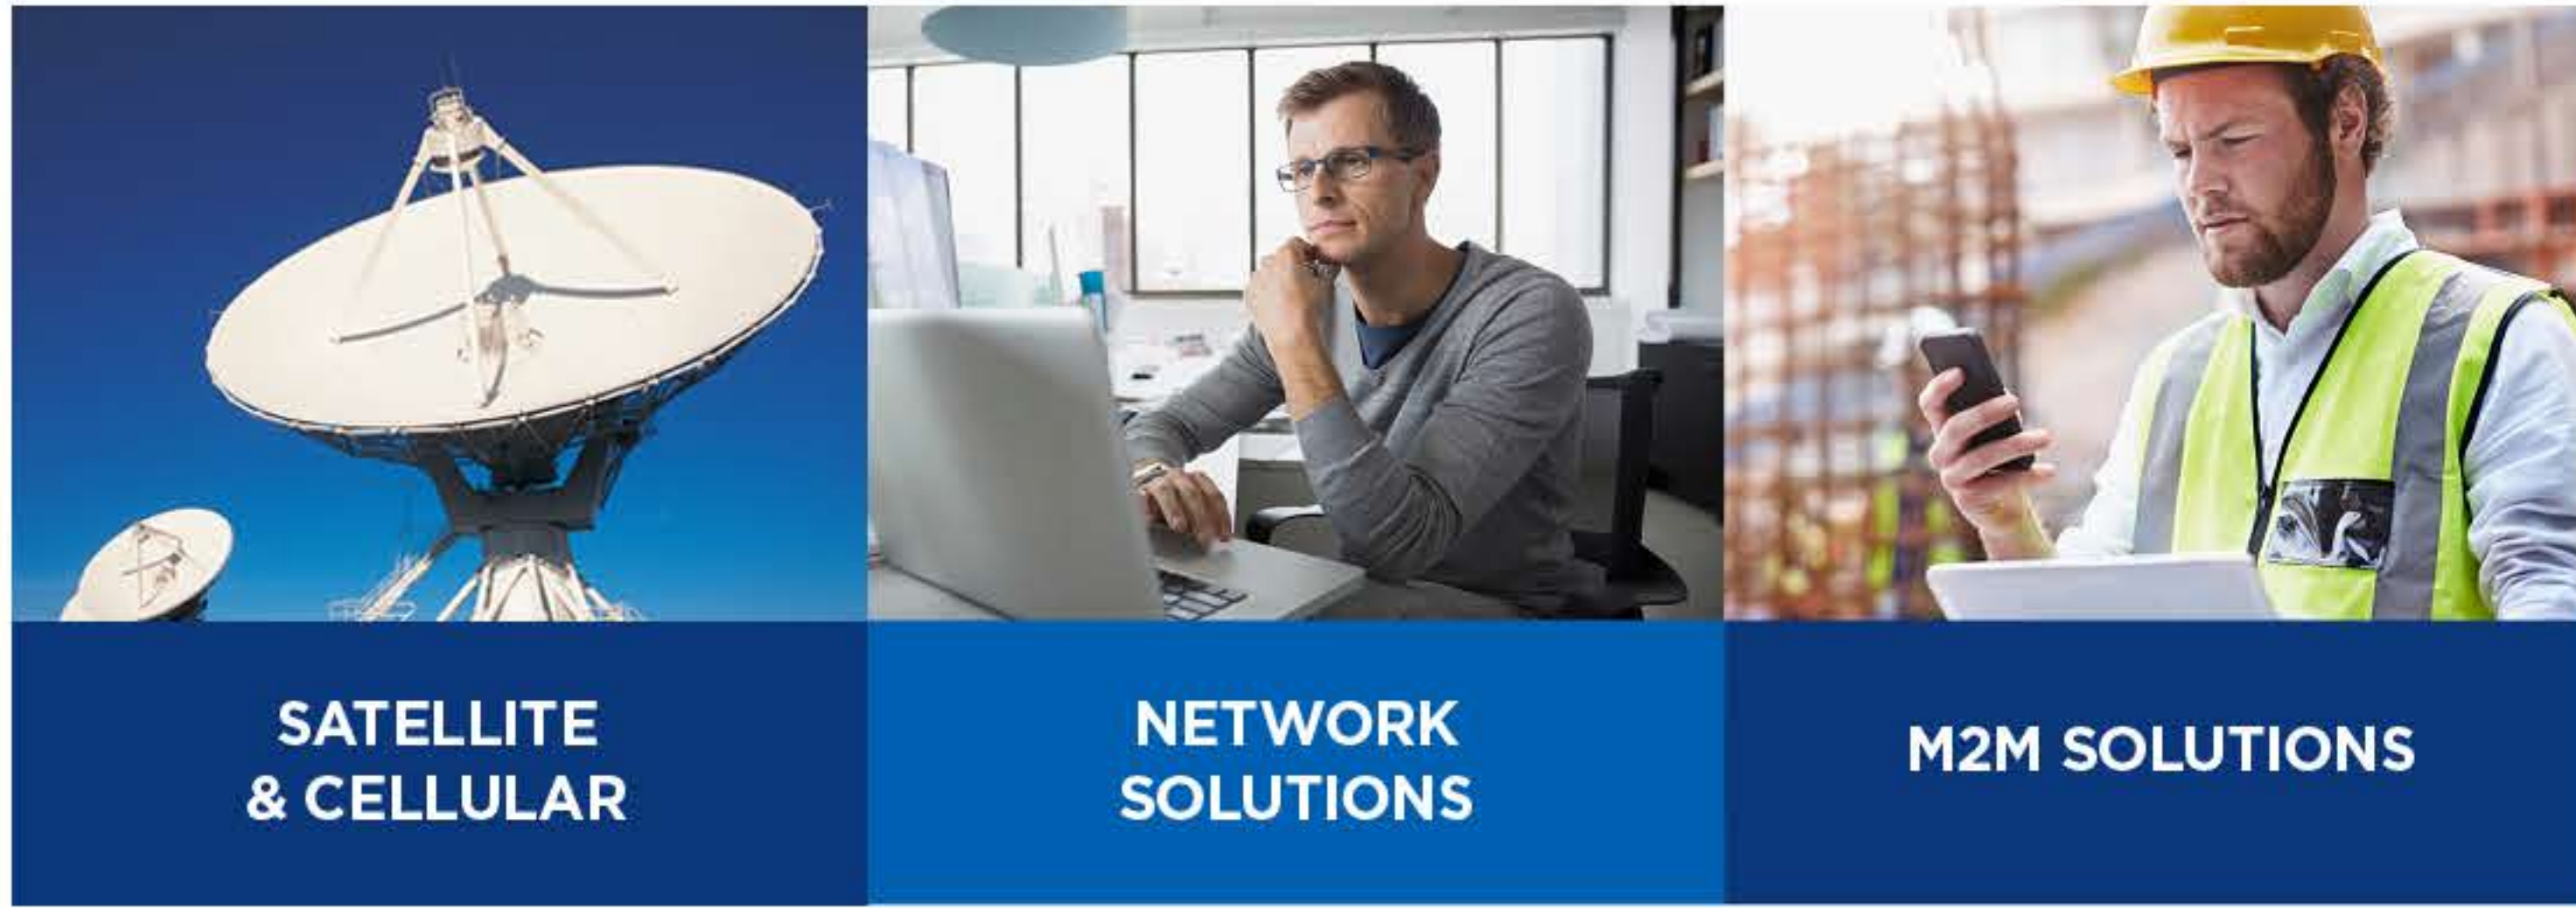

Seamless integration of best-of-breed Industrial IIoT devices, networks and applications.

Purpose-built single point of interface for simplified Industrial IIoT adoption and lifecycle management along with installation and regulation management of the intelligent infrastructure.

NETWORK SOLUTIONS

M2M SOLUTIONS

Globecomm supports dual mode capabilities enabling both cellular & global Satellite networks connectivity management in the same platform over a wide range of best-of-class market devices.

Our platform is ideally designed to remove the complexity by providing a single point of interface for networks selection, devices provisioning, billing, and device management

Multi-vendors device management capabilities enables operators to offer End-to-End M2M solutions as dual mode or as standalone satellite M2M connectivity
