

Storage.

The digital dash allows all of the gauges to be combined into one single display. Speed, engine speed, gas, and ballast tank levels are all presented in a single digital format. Also, the wakeboard tower folds flat to make storage easier. Dry storage is located on the dash and offers a secure docking station for mp3 players as well as a place to store other dry valuables. The drink cooler holds 3 cubic feet of drinks, food, and ice and is efficiently located under the swim platform walkway.
