

Simple : Decent : Affordable : Sustainable

Habitat for Humanity Las Vegas
Green LEED Home Prototype

Habitat for Humanity Las Vegas has embarked on a bold new journey to build a more *affordable, sustainable* future for the underserved residents of Southern Nevada. Using the nationally recognized standard of **Leadership in Energy and Environmental Design for Homes** (LEED-Homes), Habitat has recently completed *two prototype houses* projected to achieve Platinum certification, the highest level of green building rating currently attainable.

Please join **Habitat for Humanity** and **US Green Building Council** in celebrating this important milestone in our community.
