

STEPPING UP TO ALGEBRA

Silicon Valley Education Foundation

Parent Night!

Stepping Up to Algebra is a program offered by Silicon Valley Education Foundation to help 8th graders pass the California Standards Test. By partnering with WestEd and using their Aim for Algebra curriculum, SUTA focuses on the typical barriers to success in Algebra.

If your child is enrolled in this program, we would like to invite you to an information session with Silicon Valley Education Foundation to learn more and ask questions!

District: **Sunnyvale**
