## Cold Weather Compression

### General Description:

The latest in sports minded winter base layer. Gradient compression with a Weather Shield outer layer. Same gradient compression garment with panels of Weather Shield sewn on in strategic places to defend against the cold.

### Protection Areas:

- One piece front that wraps around sides slightly and covers top of shoulders
- Front of legs, below knee, wrapping around to the back portion of the legs.

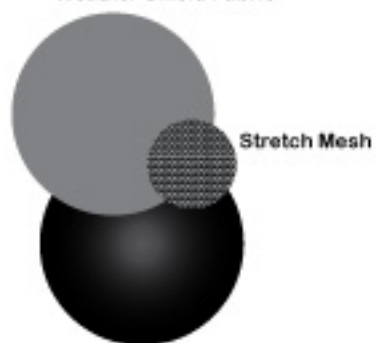

### Cut:

- Exaggerated set in sleeve top for full arm range of motion. Contoured flat lock stitching and strategically place vent panels
- Ergonomically cut pants for excellent mobility. Contoured flat lock stitching

### Fabric:

- Wrap knit gradient compression spandex-same as current Skins
- "Weather Shield"- thin winds proof, water repellent membrane.

Weather Shield Fabric

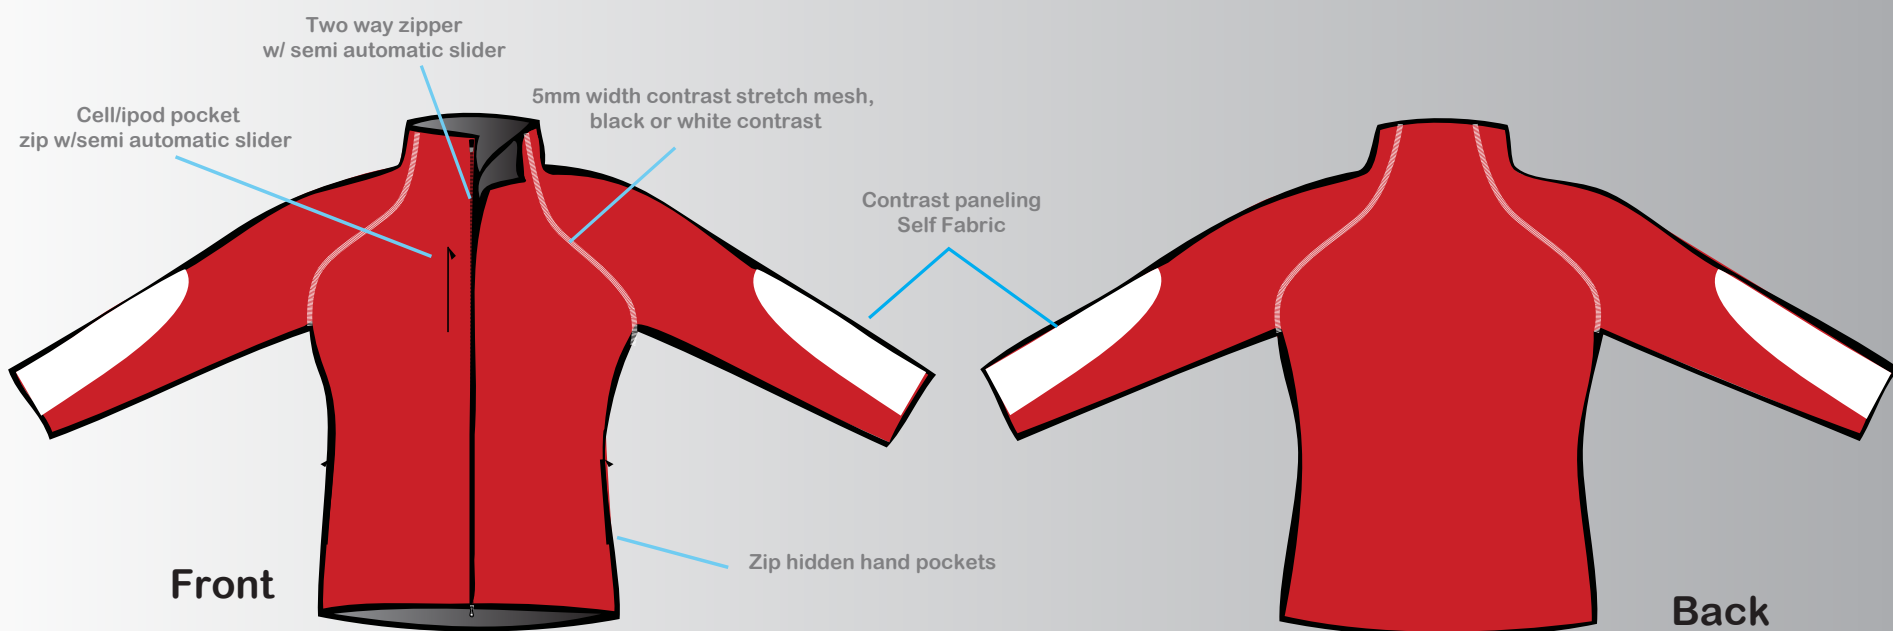

Warp knit gradient compression material
