Marc Newson's Furniture Designs are very intriguing, conveying, playful, unique pieces of art that at same time, show elegance and functionality. Something I admire about Marc Newson is that any material he decides to work with is not a barrier for him. If he designs something and decides to apply a very unusual material, he always finds a way to make it work. For example, here we have samples of his work that show those challenges using these types of materials, such as, carbon fiber, marble, aluminum, and wooden strips.
