

Three Step Post-Operative Care System

One simple system for post-operative care.

Our three step, three solution system streamlines post-operative care procedures to help promote optimal wound care and help reduce the risk of infection.

Step 1: Close

3M™ Steri-Strip™ Adhesive Skin Closures may help reduce the risk of surgical site infections (SSIs)^{1,2} while providing wound support³.

Step 2: Protect

3M™ Cavilon™ No Sting Barrier Film forms a protective barrier between the skin and the adhesive of the dressing, device or tape to help reduce the risk of skin trauma before it occurs.

Step 3: Cover

3M™ Tegaderm™ +Pad Dressings are an effective viral* and bacterial barrier to some of the most common SSI organisms, which helps create an environment for healing.

*In vitro testing shows that the transparent film dressing provides a viral barrier from viruses 27 nm in diameter or larger while the dressing remains intact without leakage.

Get a free sample kit!

Fill out the form to receive a free sample kit that contains:

- (1) 3M™ Steri-Strip™ Antimicrobial Skin Closure (¼ in. x 3 in.)
- (1) 3M™ Steri-Strip™ Reinforced Skin Closure (½ in. x 4 in.)
- (1) 3M™ Cavilon™ No Sting Barrier Film (1.0 mL)
- (1) 3M™ Tegaderm™ +Pad Dressing (2⅞ in. x 4 in.)
