The 2010 Audi A5: A Timeless Coupe

The two-door Audi A5 is a perfect example of sophisticated style, luxury and performance all in perfect harmony. Designed to always be contemporary, the A5 will look progressive for years to come. The interior of the A5 not only offers uncompromising luxury, but innovative and intuitive technology to enhance your driving experience.

The A5 experience begins with a powerful turbo-charged 211-hp DOHC aluminum 2.0 liter four-cylinder engine with FSI® Direct Injection, variable valve timing, intake manifold, and Audi valve lift system. The A5 comes standard with a six-speed manual transmission or select the available TripTronic automatic. The TripTronic automatic transmission is standard on the 265-hp A5 DOHC aluminum 90-degree 3.2 liter V6 models.

A glimpse inside the driver-oriented cockpit of the A5 confirms its benchmark status. Only the finest materials and unparalleled craftsmanship are used to create a memorable driving experience. Among them are genuine wood inlays, leather-wrapped steering wheel, leather seating surfaces and a unique three-piece Panorama sunroof. A5 offers complete luxury in entertainment as well, thanks to the available Bang & Olufsen® sound system and Audi Concert radio with SIRIUS® Satellite Radio.

Audi advanced technology provides for a number of exciting enhancements to convenience, safety, performance and luxury. Available Audi Side Assist system helps monitor the blind spot areas when changing lanes, as well as fast-approaching vehicles. Adaptive cruise control, an available feature, monitors distance to the vehicle in front via radar sensors and automatically reduces speed, as well as resumes speed to maintain the driver-selected safe distance. The available Audi Drive Select manages the adaptive suspension, dynamic steering, transmission shift characteristics and throttle response according to the driver's choice of Automatic, Dynamic, Comfort or Individual settings.

See Newport Beach Audi for details.
