## Audi TT Roadster: Progressively Designed

The Audi TT Roadster offers a unique, top-down way to take in the drive. With the potent engines and race-bred handling, the TT Roadster effortlessly devours twisty roads delivering an unforgettable driving experience. Retractable rear spoiler automatically extends at 75 MPH and retracts at 50 MPH. The twin aluminum trimmed rollover bars combined with the iconic silhouette mean it can only be one car: the TT Roadster.

Once inside, it is easy to understand the priorities of the TT Roadster. Although the Audi TT Roadster delivers premium performance, it also delivers unrestrained luxury. The driver-oriented cockpit offers contemporary design and the finest materials. From the available Madras Brown Baseball Optic leather seats to Brushed Aluminum Inlays and the convenience of Audi music interface, the TT Roadster offers a number of luxurious appointments that set it apart from everything else.

The TT Roadster offers a number of innovative, state-of-the-art technologies that not only increase performance, but also deliver increased efficiency. The 2.0 TFSI® with direct injection technology does the remarkable by producing 200 horsepower and providing great fuel efficiency with an estimated 29 MPG highway for the TT Roadster equipped with Audi's quattro® permanent all-wheel drive system. Audi Magnetic Ride technology utilizes a special magnetically charged fluid whose viscosity continuously adapts to driving dynamics and can be controlled electromagnetically allowing for two different damping modes: "Normal" or "Sport".

S tronic®, Audi's revolutionary direct shift gearbox combines the advantages of a conventional six-speed manual-shift gearbox with the qualities of a modern automatic transmission, thanks to a dual-clutch system. Shifts can be engaged either through the shift lever on the console or by Aluminum Optic shift paddles located behind the steering wheel. Audi launch control optimizes acceleration from a standstill.
