

Sketch

Here comes with two categories design of salt and pepper shaker:

—Interactive salt and pepper

I wish the pair of salt and pepper can have some interaction with each other and also with users.

—Proud salt and pepper

There is a great amount of people will leave salt and pepper shaker on the table. To compare with other dining utensils and flavoring, salt and pepper are the only thing that will stay on the table for a long long time. I think this status somewhat shows how proud of salt and pepper are!
