**OUR MISSION**

Applied Concepts Aircraft Solutions, Inc. (ACAS) provides the Aerospace Industry with Design Engineering, FAA Certification and Manufacturing Services.

ACAS Inc. is committed to providing quality Design/Engineering while meeting all schedule and budget requirements.

The concentration of experience and resources our staff can offer, provides the Aircraft Industry with a unique opportunity. It is our main focus to provide Aircraft Design/Operators, Aircraft Component Manufacturing Companies, Component Centers and Aircraft OEMs with years of experience in seatbelt Design, Aircraft Interior Panel Systems, Seating, Cabinetry Components, Lighting, Entertainment Systems, Mechanical/Electrical Systems and all emergency requirements.

"ACAS is dedicated to building long-term relationships with Customers through innovative designs and quality customer support. Our mission is to exceed Customer expectations and exceed our reputation as a Leading Design and Engineering Company in the International Aerospace Market."

Monsi (Perry) Lorez de Mola founded ACAS in January 2008, with the intention of providing the Aircraft Industry with Design/Engineering, FAA Approval Certification and Manufacturing of Mechanical Parts services under one organization.

Mr. Lorez de Mola has distinguished himself as an inventor with unique designs in the development of new aircraft interiors, component design and in the implementation of new technologies.

His experience includes the evolution of Aircraft Interiors from the initial general arrangements and development of the aesthetic conceptual design through the completion of the Engineering Certification, installation to final delivery of the aircraft to the customer.

In addition, designing of Airframe, Mechanical Systems, Lighting, Seats, Chair, Interior Panel Systems, Inertial Reference Equipment, Galley, Galley Equipment/Systems, Cabinets, Tables, Barrels, etc.
