

COFA ENGINEERING

COFA Engineering specialise in bespoke bicycle design. COFA is led by engineer Steve Major at his workshop based near Bristol, UK. In 2011 Steve asked me to help come up with some designs to showcase at Bespoked the largest bespoke bicycle show in Europe. I designed a wide variety of parts for Steve over a period of 8 months.

COFA Engineering has since established itself within the industry and is regarded as a company which produces high quality custom parts.
